ran's New Chief f Defense Plans To Purge Forces

From Agency Dispatches

HRAN, Sept. 30 — Iran's first an defense minister, Mostafa Chamran, said today he would the armed forces, starting at op.

his first interview since his ap- iment two days ago, the 48- old former guerrilla told the an daily, Kayhan, that the was intended to bring the d forces up to Islamic and rev- onary standards.

r. Chamran, who as a deputy ier had been responsible for ig up revolutionary Iran's new igence agency, said, "The will start from the top and ater reach lower levels."

paper, Iran has 285,000 men e ground forces, 100,000 in the rce and 28,000 in the navy. s of senior officers have been ted since the revolution in uary and many more have fled ad or have been sacked.

r. Chamran, who supervised re- government operations against lish rebels, also said that Iran ed to buy spare parts for its ary equipment, especially its U.S.-made helicopters and fighters, but would only do so if no political strings were attached to such purchases. Otherwise Iran would "buy other articles elsewhere," he said.

Meanwhile, the former Iranian oil chief, Hassan Nazih, who was dismissed Friday from his position after Islamic groups denounced him as a "Westernized devil," failed to respond to a summons from the national prosecutor yesterday and his whereabouts were still unknown today, informed sources said.

Mr. Nazih's disappearance followed Ayatollah Ruhollah Khomeini's orders to Premier Mehdi Bazargan to ensure the French-educated lawyer was put on trial if sufficient evidence was produced against him.

Mr. Nazih's household said they were ignorant of his whereabouts.

Islamic groups within the company, who supported the clergy's campaign to oust Mr. Nazih on grounds his acts were violated Islamic law, called for Mr. Nazih's trial as a counterrevolutionary. The offense carries a maximum penalty of death.

Yesterday a key aide of Ayatollah Khomeini charged that Mr. Nazih set for himself a salary of $9,280 per month "while every effort was being made to cut expenditure."

Mr. Nazih's north Tehran home was surrounded by about a dozen revolutionary guards. His wife told Iranian newspapers she was "not allowed to leave the house."

Mr. Nazih was removed by Mr. Bazargan Friday night in a government reshuffle which gave responsibility for the oil, gas and petrochemical companies to a newly created oil ministry.

Ali Akbar Moinfar was moved from the plan and budget organization to become the oil minister. Sources close to the government interpreted Mr. Moinfar's appointment as a success for Mr. Bazargan's brinkmanship between the technocrats and the clergy.

Yesterday, however, in an appar-

A laughing President Carter makes a joke and draws smiles from President Jose Lopez Portillo of Mexico and his wife, Carmen, while making a toast at a state dinner at White House.

Carter, Lopez Portillo Agree

U.S. and Mexico to Discuss Compensation in Oil Spill

By Martin Tolchin

WASHINGTON, Sept. 30 (NYT) — President Carter and President Jose Lopez Portillo of Mexico agreed yesterday to have their governments begin negotiations concerning compensation by Mexico for damage caused to the United States by the runaway oil well in the Gulf of Mexico, administration officials said.

"There was agreement to deal with environmental questions, including the oil spill, on a high-priority, urgent basis," an official said.

Asked if the negotiations would deal with the question of compensation, he replied, "That's a logical assumption." Mexico had previously refused to discuss the issue.

The two presidents reached the agreement during a 90-minute White House discussion that the officials termed "substantive and thoughtful." The meeting concluded a two-day visit by Mr. Lopez Portillo, and the third series of meetings held by the two presidents.

Mr. Carter said that the talks had taken place within "a framework of friendship and deep understanding." He said that their meetings were "the only way in which we can guarantee our constant contact, communication, for harmonious coexistence and the only manner in which all the countries of the world can live within a system of dignity and peace."

Similarly, Mr. Lopez Portillo said that "I want to express my profound satisfaction with the results of our meeting."

Last month, the Mexicans were furious that Washington had announced that it was seeking talks to discuss compensation for the oil spill without awaiting a Mexican reply.

In a joint press statement yesterday, however, the two presidents "agreed on the need for both countries to prevent events or actions on one side of the land or maritime boundary from degrading the environment on the other side."

Flies to U.S. Today

Pope Rules Out Violence, Demands Peace in Ireland

From Agency Dispatches

KNOCK, Ireland, Sept. 30 — Pope John Paul II told Irishmen today that "evil means can never lead to a good end," and "murder is murder no matter what the motive or end."

On the second day of his 9-day journey of peace to Ireland and the United States, the pope again strongly condemned religious bloodshed in Ulster, and pleaded for Catholics and Protestants to put down their guns and embrace in peace.

The pope is scheduled to arrive in Boston tomorrow to start his U.S. tour.

In Belfast, the outlawed Irish Republican Army issued an "authorized" statement branding as "a malicious lie" a report that it was considering a cease-fire in response to the pope's appeals. "The war goes on," an IRA-oriented publication declared.

The Rev. Ian Paisley, the hardline Ulster Protestant leader, said that the pope's appeals "will only give comfort to the terrorists" of the mostly Catholic IRA.

"I don't think it will be of any influence to the hard-core men of violence," said Harold McCusker, a Protestant member of the British Parliament from Northern Ireland, "but perhaps other people who might become involved on the fringe of terrorism might think again."

A statement from the British government office that oversees Northern Ireland said, "The pope's condemnation of violence will be widely and genuinely welcomed by the vast majority of the people of Northern Ireland."

Gerry Fitt, Northern Ireland's most prominent Catholic politician, said that the "spontaneity" of an enthusiastic crowd's reaction yesterday at Drogheda "must have indicated clearly to those who are engaged in violence that they are not carrying the majority of the people with them." He called the Rev. Paisley's statement "absolutely disgraceful."

The Protestant primate of the Church of Ireland, the Most Rev. G.O. Sims, said that his people should be "greatly encouraged" by the pope's message at Drogheda. The Rev. Eric Gallagher of Belfast, a Methodist leader, said, "The speech was first-rate. It was what the country needed to hear."

Appeal to Terrorists

In the powerful appeal for peace in Northern Ireland delivered near the strife-marred border between north and south yesterday, Pope John Paul implored terrorists "to desist from hatred and violence and to repent."

"I appeal to you in language of compassionate pleading," the pope said in Drogheda a few hours after he arrived to a tumultuous welcome in Dublin. "On my knees I beg you to turn away from the path of violence and to return to the ways of peace," he said. "You may claim to seek justice. But violence only delays the day of justice. Violence destroys the work of justice."

The pope spoke against the backdrop of recently intensified terrorist activities by the IRA, including the assassination of Lord Mountbatten. He stopped short of condemning the IRA by name.

"Violence is not the way of the Catholic Church," the 59-year-old pontiff said in his homily to more than 200,000 people gathered in a natural amphitheater outside the historic town north of Dublin. He attempted to allay suspicions among the Protestants of Northern Ireland about the Catholic Church and the papacy, hostility and distrust that date to the Reformation in England.

Irish Protestants should not "think that the pope is an enemy, a

Chinese are particularly sen- about the security of Xinjiang , a territory in which their nu- and missile installations are d. A nuclear ground test was ted early this month in the ert about 300 miles from , the capital of the autono- gion.

Many soldiers are evident on the streets of Urumchi, a dusty city of nearly a million inhabitants situated in a valley at the northern edge of the Tien Shan mountain range. Mr. Abdulla is a Uighur, a member of one of the 13 national minority groups living in Xinjiang Uygur.

He described the border dispute as having become "very complicated." He said some sections of the demarcation line were based on a treaty and others on the Soviet map line, which exceeded the treaty, and that some areas were determined simply by which country's troops were in position.

"In some disputed areas, the Russians are intruding into Chinese territory bit by bit," Mr. Abdulla said. "They are using tractors to plow the land and each year they penetrate farther. They set up barbed-wire fences and put rolls of barbed-wire on the ground that ensnare grazing animals."

Arbatov: Carter Undermines Trust

Cuba Issue Raises Soviet Doubts On Working With U.S., Aide Says

By Kevin Klose

MOSCOW, Sept. 30 (WP) — A senior Soviet official says that the current Cuba crisis has raised "many doubts" about the Carter White House, and he hinted that Moscow may be approaching a point at which it can no longer work constructively with the current administration on major international issues.

In an interview Friday, Georgi Arbatov, alternate member of the Soviet Central Committee and adviser to President Leonid Brezhnev, made it clear that the Soviet Union has no inclination to make any move of its own that would resolve what he called the "fabricated issue" of Soviet combat troops in Cuba.

• Carter gets advice from senior advisers on the Cuban situation. Page 2.

Mr. Arbatov gave the interview on the ground that he be quoted solely as head of Moscow's Institute on the U.S.A. and Canada, the main American affairs think-tank, and not as a government official. However, it is unlikely that Mr. Arbatov could speak independently, given the nature of the Soviet system.

'Painful Fact'

Mr. Arbatov said that he would not exclude the possibility that Soviet-American relations will worsen over the issue, adding, "This is a painful fact which we have to face."

The issue, he said, has raised in Moscow "many doubts about the goals of American policy, what the Americans are up to, what do they want, how you can understand this vacillation in their policy and whether they really are partners with whom you can do this tremendously important job of lessening [world] tensions."

Underlying Mr. Arbatov's remarks, apart from restatement of uneven bilateral relations during the 2½-year Carter presidency, was a feeling that the two countries may be reaching a crossroads on the Cuban issue that will affect their relations through the next year.

Mr. Arbatov said that it was up to the Carter administration to show "enough wisdom and statesmanship" and revive Soviet-American relations "without serious damage to the serious issues which face us."

The president reaffirmed last Tuesday the U.S. contention that a Soviet force in Cuba included a combat brigade, despite Soviet denials, and said he would take action "to change the status quo" if the talks failed between Soviet Foreign Minister Andrei Gromyko and Secretary of State Cyrus Vance.

There was no detectable crisis atmosphere in Moscow Friday night because neither side is comparing the situation to the Kennedy-Khrushchev nuclear missile showdown of October, 1962. There is no indication that strategists in either capital are contemplating use of force; what makes this crisis unusual is that neither side has spoken in terms of any military action.

But, as Soviet advisers here analyze the crisis, the Carter administration will not be able to extricate itself from a dilemma that they blame Washington for starting — with the attendant danger of progressive and serious deterioration of overall Soviet-American relations.

As a specialist among a circle of Soviet senior advisers put it, he fears that Mr. Carter, "in the politically supercharged domestic atmosphere, has trapped himself in a position exposed to political attack for any face-saving formula he can devise. This automatically pressures him to act tougher toward us to develop his credibility as a firm, strong leader."

Other officials here see in the Cuban issue and other American moves since the SALT-2 summit in Vienna in June a mosaic that, when pieced together, spells a return by the United States to the Cold War concept that Washington must deal with the Soviets "from a position of strength. Mr. Arbatov also voiced both these notions.

"What can we do from our side in this situation? We haven't aggravated it, we have been very restrained during this period. We don't change our policy simply because somebody created this issue," Mr. Arbatov said.

Rejects U.S. View

He rejected the U.S. view that the United States has a special interest in the Caribbean area stemming from the Monroe Doctrine. The Russians are in Cuba at the invitation of Fidel Castro's "sovereign state," he asserted. "I understand many people don't like our military personnel being in Cuba, they don't like Cuba, they don't like us. But issues of international politics can't be resolved on the basis of such emotions . . . It is impossible to adjust foreign policy to political life in another country. We never demanded it from the U.S. and it is not just to demand it from us."

Although he refused to be drawn into a specific comparison of the Carter White House with other administrations, Mr. Arbatov commented that, "to prevent the [nuclear] arms race, you must have some stability, you must be sure about your partner. Our wish was to create very stable relations on an equal basis. We won't beg for it. To create good relations, you have to have efforts from both sides."

Castro Assails Carter

HAVANA, Sept. 30 (NYT) — President Fidel Castro has accused President Carter of being dishonest and of using "data from the archives" to create "an artificial problem" over the presence of Soviet troops in Cuba.

In a news conference Friday, Mr. Castro asserted that neither the number nor the role of the Soviet troops had changed in 17 years. "What you call a brigade we call a training center," Mr. Castro said. "This facility was known and is known to all the different presidents of the United States and was known by the CIA."

"I see no logic for concern," he said. "We have no nuclear weapons. We have no strategic weapons. We do not constitute the slightest threat to the United States."

After Hamburg Conference

U.S., Bonn Vow to Press Dollar Support

By John Vinocur

HAMBURG, Sept. 30 (NYT) — The leading economic strategists of the United States and West Germany, meeting here after a week of sharp declines in the dollar's value on international money markets, said yesterday that they would press efforts to strengthen the American currency.

A joint statement issued after a four-hour meeting led by Chancellor Helmut Schmidt, William Miller, the U.S. Treasury secretary, and Paul Volcker, chairman of the Federal Reserve Board, said the two countries planned to intervene quickly and vigorously in foreign exchange markets to combat "unwarranted as well as erratic movements." But the communique did not indicate if the group had decided on any new initiative to stop the dollar's slide.

A news conference was called off without explanation and Mr. Volcker, when asked if there had been agreement to free additional funds to support the dollar in international trading, replied, "Let's sit on the communique as it is."

The statement reported without elaboration that "corresponding funds are available to the intervening authorities. Volcker and Otmar Emminger, president of the West German Central Bank, reviewed intervention arrangements and will take action to assure a common agreed approach in all relevant markets.

Strong Dollar

"Both sides agreed that these developments and policies should contribute to exchange-rate stability in general and to a strong dollar in particular, which are in the interests of both countries," the statement said.

The meeting, planned more than a month ago, followed a new decline in confidence in the dollar, with the American currency's value dropping sharply last week against the major European currencies, including a 4 percent decline against the West German mark in the last 10 days. At the close of trading in Frankfurt on Friday, the dollar was worth 1.74 marks, a fraction above its lowest recorded level, in October, 1978.

Both sides maintain that the dollar is undervalued and that its decline reflects occasionally irrational market forces. The concern of the United States and West Germany, economically the strongest nation in Western Europe, is that the continuing weakness and instability of the dollar create insecurity in world trade and inhibit chances for a global economic recovery.

Mr. Schmidt, who was joined here by Mr. Emminger and Economics Minister Hans Matthofer, said last week that he saw no immediate prospects for a dramatic increase in the dollar's value, but that he hoped it would eventually reach the 2-mark level again.

Although no announcement was made of any new efforts to support the dollar, the undersecretary of the Treasury, Anthony Solomon, appeared to hint that some new measures might be forthcoming when he told a reporter that he could say nothing "at this point" and then asked if the reporter would be present at a meeting of the International Monetary Fund in Belgrade this week. A program to support the dollar through large-scale intervention on currency markets has been in effect since last November when the Carter administration acted to pull up the currency from record low levels.

Yesterday's communique said that the Americans and West Germans considered fighting inflation to be their first priority. It added that Mr. Volcker and Mr. Miller said they would achieve a single-digit inflation rate and a current-account surplus for the United States in the coming months through fiscal restraint and tight control of the money supply.

In addition to the talks on the dollar, the communique said, the "very useful" discussions touched on general economic problems. Both sides agreed, the statement said, that "the recent large increases in world oil prices pose a serious threat to the fabric of the world economy by feeding world inflation and reducing world economic growth. Responsible oil pricing by producers is essential to world economic growth."

Burns Urges Drastic Action To Counter World Inflation

By Hobart Rowen

BELGRADE, Sept. 30 (WP) — In a scathing denunciation of "gradualist" anti-inflationary policies that demand little sacrifice of businessmen or workers, former Federal Reserve Chairman Arthur Burns today counseled drastic action to shatter the world inflationary spiral.

Mr. Burns scoffed at the notion, which he attributed to American policy makers, that a return to price stability might be delayed for four to five years to make a deflationary crunch more palatable.

In a speech to financial leaders gathered here for the annual meeting of the International Monetary Fund and the World Bank, which opens tomorrow, Mr. Burns spelled out a four-part austerity program for the United States.

Presumably, although he did not use the word, a deep recession would be the ultimate result of Mr. Burns' austerity program. He referred elliptically to "difficult adjustments."

Constitutional Amendment

Mr. Burns' four-part program called for a constitutional amendment making it more difficult to run federal budget deficits, dismantling excessive regulations, and constituting a binding endorsement of restrictive monetary policies until inflation had been reduced.

The final part of the Burns prescription was a five-year schedule of tax reductions for business — small in the first two years, and becoming substantial in the final years.

The central theme of Mr. Burns' address was that the post-war commitment to full employment had given an inflationary bias to economic policy-making.

All over the world, he said, the inflationary process had taken hold, with central banks caught up in it. In the United States, he charged, the Federal Reserve had been reduced to "undernourishing" inflation, rather than stopping it completely.

Meanwhile, Mr. Burns held, the ability of central banks to restrain excesses in an economy had been eroded by the inflation "premium" built into interest rates. "Inflation has often taken the sting out of interest rates, especially, as in the United States, where interest payments can be deducted for income tax purposes," he said.

Political Forces

Thus, the "anguish of central banking" — the title of the Burns address — is that, in today's climate, the banks' "practical capacity for curbing an inflation that is continually driven by political forces is very limited."

He cited some "tenuous and inconclusive" signs that the political environment is changing enough to allow some of the "difficult adjustments required to end inflation."

These include, he said, a loss of influence by the Keynesian school of economics, which focuses on the problems of unemployment, and on management of demand. He said that many economists recognize that much unemployment is voluntary and that "collecting unemployment insurance was becoming a way of life for too many."

Mr. Burns wound up on a pessimistic note, expressing doubt that any forceful program to combat inflation would be undertaken soon in the United States and elsewhere. He also doubted that even central bankers, "by now having become inured to gradualism, would be willing to risk the painful economic adjustments that I fear are ultimately unavoidable."

Scepter Said Used as Weapon

Bokassa Killed Students, 2 Survivors Say

By Michael Goldsmith

BANGUI, Central African Republic, Sept. 30 (AP) — At least two survivors of the April 19 massacre in Bangui's Ngaragba Prison say that they saw Jean Bedel Bokassa kill several young boys by striking them on the back of the skull with his ivory-encrusted ebony cane.

The two students, Simon Jeudi and Jules Bao, said that they were among hundreds of youngsters aged from 6 to 20 rounded up by the former emperor's police and troops and taken to the prison or to various police stations in the Central African capital.

Mr. Jeudi, 18, said that he was herded with some 40 other children into a windowless cell while being beaten by the guards with clubs and rifle butts.

"It was the youngest and smallest ones that suffered the most," he said. "Many of them suffocated in the crush of prisoners in my cell. Many others died of terrible head injuries.

"I myself had my left forearm broken, a bad wound in my right temple and a very painful injury in the small of my back that still hurts now, six months later. It was caused when a soldier trampled on my body lying on the ground.

"I survived only because I pretended to be dead."

Mr. Jeudi and Mr. Bao, 19, said the mass arrests were the climax of several months of student agitation against the self-crowned emperor, who had ordered all students to wear uniforms made by a company controlled by his wife, Empress Catherine.

A French woman teacher at Jules Bao's school, the Pope Pius XII College, recalled that she pleaded with the education ministry in January to ease the requirement because few of her students could afford the blue outfits costing up to $20 each.

'State of War'

There is no firm count of how many children died in the Bangui massacre. Amnesty International, the first to disclose it, and an African commission of inquiry estimated that about 100 were killed. Some sources said this was a conservative figure.

In January, several students were killed when police opened fire on an anti-uniform demonstration. The killings intensified the agitation, Mr. Jeudi and Mr. Bao said, and by April the police and students "were practically in a state of war."

In mid-April, four armed plainclothesmen tried to infiltrate a student strategy meeting, Mr. Jeudi recalled. "We spotted them at once and tried to push them out. When they pulled their guns, we overpowered them, stripped them naked and sent them out into the street, telling them to report back to their emperor in that condition."

The two students said they assumed it was this incident that aroused the emperor and led him to order the mass arrests of schoolchildren and students.

Shortly after dusk on April 19, soldiers went from house to house in Bangui, arresting "all the children they could find," Mr. Jeudi said. "I was taken to Ngaragba, together with many other kids I did not know. Some of them were less than 6 years old and were crying.

"In the prison, we were brutally beaten by the guards and pushed into a row of cells so crowded that no one could sit down. There was no air and the floor was covered with excrement. Some of the children died very quickly from the awful heat and crush and lack of air or from their injuries. There was blood everywhere."

"About 10 p.m., the steel door opened and the emperor came in, shouting that he would teach us a lesson. I already had a broken arm and other injuries and was on the floor among several dead kids where I decided to pretend I was dead, too.

"I saw the emperor repeatedly striking several of the kids on the back of the head with his cane. Several died in this way, but I could not count them.

"Then the emperor told the soldiers behind him to 'carry on' while he went on to the other cells to do the same there. I could hear the terrible screams from the other cells while he was there.

Mr. Jeudi, who has extensive scars on his back, arms and legs, said he was one of three survivors in his cell, among at least 40 prisoners.

Imperial Scepter

Mr. Bao was in a neighboring cell containing 15 children. He corroborated Mr. Jeudi's account and said he survived only because "I do a lot of sports and was in good condition," and because he had room to move and dodge some of the blows.

He also testified that Mr. Bokassa entered his cell and struck the prisoners with the ebony cane he used as an imperial scepter.

Charlotte Pognagba, a teacher of French and history at the Pope Pius XII College, said she saw convoys of trucks taking bodies out of the prison the next day, April 20.

In a broadcast on April 21, Mr. Bokassa abruptly announced an amnesty for the "rebel students" and all the survivors were released.

Amnesty International issued its report a month later, starting a chain of events that led to Mr. Bokassa's ouster on Sept. 20.

Shallow Graves

A farmer living in the Bazoubangui district, about three kilometers from the city, said he had seen soldiers burying more than 100 bodies in shallow graves in a disused quarry near the edge of a cemetery.

The farmer, Albert Yamani, tried to guide two Western correspondents to the spot. The way was barred by a group of Central African soldiers who were visibly in an ugly mood.

The soldiers, presumably loyal to the new regime of President David Dacko, were not interested in explanations. When they made threatening gestures, the reporters retreated.

"If I had been alone, they would have killed me," Mr. Yamani said quietly.

Assassination Attempt Denied

BANGUI, Sept 30 (Reuters) — Central African President David Dacko yesterday denied reports that an attempt had been made to assassinate him. French television had earlier quoted unconfirmed reports that a senior army officer fired several shots at Mr. Dacko, who escaped unharmed.

On Dealing With Soviet Troops in Cuba

Carter Gets Advice From Ex-Officials

By Bernard Gwertzman

WASHINGTON, Sept. 30 (NYT) — President Carter received wide-ranging and often conflicting advice in a White House meeting yesterday from 15 former high officials prominent in the national security field on how to respond to the Soviet-American deadlock over the reported Soviet combat brigade in Cuba.

According to participants in the session, Mr. Carter indicated to the panel that he already had a general idea of what he wants to tell the nation in his speech tomorrow night. He asked each of the men to comment or offer other opinions.

After the White House lunch with the group, Mr. Carter flew to Camp David to work on his report, that will be given over national television tomorrow night.

'Extraordinary'

"It was an extraordinary experience," a participant said. Organized into one group for the last two days were three former secretaries of state — Henry Kissinger, William Rogers and Dean Rusk — as well as other ranking members of previous administrations.

Clark Clifford, chairman of the group, said later that there was an understanding by the participants not to comment publicly about the proceedings. But some of them were willing to discuss privately the way the meeting was handled.

"We weren't asked to come up with a consensus or any specific recommendation," one said. "That would have been impossible, given the mix of Republicans and Democrats, hard-liners and doves."

"There was a wide variety of views," another said, "and a real desire to be helpful, a real feeling by everyone that this is an issue we have to look at together, a national issue which calls for a national response, and a very serious effort to give the president our best judgment."

Alternatives Offered

No one predominated, participants said. "Even Mr. Kissinger was treated as an equal and no one tried to outshout the other," one said.

It was not clear, however, what Mr. Carter will tell the nation. He has been offered various alternatives, ranging from stepped up military surveillance of Cuban and Soviet activities, increases in defense spending, and moves to harass the Russians by improving ties with China.

Although the impasse over the American contention that the Russians have a 2,000- to 3,000-man combat brigade in Cuba has seemed to sour Soviet-American relations, there was no crisis atmosphere in Washington. This was due largely to the administration's insistence that the brigade posed no security threat to the United States and that no military confrontation was contemplated. Therefore, the problem is viewed here primarily as political.

The issue put to the panel — referred to by the White House as "the Wise Men" — is how to carry out Mr. Carter's pledge not to accept the status quo regarding the brigade, without ruining chances for passage of the strategic arms treaty, and not weakening U.S. prestige abroad.

Mr. Vance discussed the matter with European allies in New York last week. He was left with the impression, an official said, that the Europeans were concerned that the Cuban issue, which they regarded a minor, ought not to block the strategic arms treaty, which they view as crucial to future defense and arms control planning in the alliance.

The panel is headed by Mr. Clifford, 72, who has served as a political adviser to Democratic presidents since Harry S Truman, and who was Lyndon Johnson's defense secretary at the end of Mr. Johnson's term.

Originally, the Clifford group had seven members, but it was enlarged in recent days; it now totals 16. One of them, William Scranton, former Pennsylvania governor, and delegate to the United Nations under President Gerald Ford, did not attend yesterday's lunch.

Besides Mr. Clifford, that group included: John McCloy, 84, high commissioner for Germany after World War II; McGeorge Bundy, 60, national security adviser to Presidents John Kennedy and Johnson; Sol Linowitz, 65, a Panama Canal Treaty negotiator; David Packard, 67, deputy secretary of defense for President Richard Nixon; John McCone, 77, head of the CIA under Mr. Kennedy; and Brent Scowcroft, 54, national security adviser to Mr. Ford.

They were joined by nine additional former officials Friday night at the White House, where they were briefed by Adm. Stansfield Turner, director of Central Intelligence. Also present were two new White House aides, Lloyd Cutler and Hedley Donovan, who were largely responsible for the idea of the "Wise Men," as a follow-up to the practice of seeking outside counsel that was used by Mr. Carter at Camp David in July prior to his energy and leadership speech.

Panel Makeup

Yesterday morning, the entire group, minus Mr. Scranton, met with Mr. Vance, Zbigniew Brzezinski, the national security affairs adviser, Defense Secretary Harold Brown, Adm. Turner and other officials prior to a lunch with Mr. Carter.

In addition to Mr. Kissinger, 56; Mr. Rogers, 66, and Mr. Rusk, 70, the others at the lunch with Mr. Carter included: George Ball, 70, undersecretary of state for Mr. Kennedy and Mr. Johnson; Roswell Gilpatic, 72, deputy secretary of defense for Mr. Kennedy; Averell Harriman, 87, who has served every Democratic president since Franklin Roosevelt and was a wartime envoy to Moscow; James Schlesinger, 50, head of the CIA and defense in the Nixon and Ford administrations and energy secretary for Mr. Carter; and Nicholas Katzenbach, 57, attorney general and undersecretary of state for Mr. Johnson.

Vance, Dobrynin Meet

WASHINGTON, Sept. 30 (AP) — As President Carter worked at Camp David on a speech on the Cuban issue, Secretary of State Cyrus Vance and Soviet Ambassador Anatoly Dobrynin held a surprise meeting today at the State Department.

Associated Press

Deposed President Francisco Macias Nguema of Equatorial Guinea leaves the court after his trial on charges of genocide.

Radio Reports Execution Of Macias, 6 Top Aides

MADRID, Sept. 30 (UPI) — Refusing food and scorning the tears of six other condemned men, Francisco Macias Nguema, deposed dictator of Equatorial Guinea, was executed by firing squad on the 11th anniversary of his election as president, Radio Malabo reported today.

Mr. Macias, 57, and six of his closest collaborators were executed at a prison in the Guinean island capital yesterday afternoon, six hours after a joint civilian-military court had sentenced them to death for multiple assassinations.

Mr. Macias, accused of genocide, treason, embezzlement and a systematic violation of human rights, was convicted of killing more than 100 Guineans.

Radio Malabo said that the former president-for-life received word of his fate impassively, while some of his aides broke down and wept.

Mr. Macias, a Catholic, declined to have his confession heard, saying he had no guilt to confess, the radio said.

The men executed with Mr. Macais, apparently without chance of appeal, included a 19-year-old nephew and a prison chief found guilty of loosing his German shepherd dog on prisoners to devour them.

Reports reaching Madrid said that Guineans laughed, cried and embraced each other as word of the execution was made public. Mr. Macias, who took the once prosperous West African nation from Spanish sovereignty to national ruin, is believed to have had between 40,000 and 90,000 people killed during his brutal rule.

He was ousted by his defense minister, Lt. Col. Obiang Nguema Mba Nzogo, in a near-bloodless coup on Aug. 3.

The executions were carried out in private, in the presence of a small number of relatives and the members of the court that ordered them. The capital was reported to be calm today.

Some reports said the executions were performed by Moroccan soldiers who arrived in Malabo a week ago to help keep order during the trial.

These reports said that Guinean soldiers had refused to pull the trigger on Mr. Macias, for fear the spirit of the "Tiger of Malabo" — a widely held superstition based on the dictator's cruelty and claims to invulnerability — would take revenge on them after death.

FBI Reportedly Rejects Charges Against Jordan

LOS ANGELES, Sept. 30 (Reuters) — FBI agents say there appears to be no substance to allegations that White House chief of staff Hamilton Jordan used cocaine during a party here in 1977, the Los Angeles Times said yesterday.

The newspaper, quoting sources familiar with the investigation, said the preliminary inquiries were about 95 percent complete. The newspaper also quoted what it described as a reliable source in Washington as saying, "Unless something unusual turns up, it appears no one is going to be found to corroborate the allegations against Jordan." FBI agents said there appeared to be no substance to the allegations, the newspaper added.

The FBI has interviewed actress Shirley Maclaine and others who attended a party at the Beverly Hills home of industrialist Leopold Wyler during a visit Mr. Jordan made to southern California in October, 1977.

But FBI agents have not yet interviewed Lana Rawls, former wife of singer Lou Rawls, who, according to her lawyer, has said she bought cocaine for a member of Mr. Jordan's party at a Los Angeles club.

Mrs. Rawls, the principal accuser, was originally quoted by her lawyer, Irving Osser, as saying she saw Mr. Jordan use cocaine at the party. But Mr. Osser said his client later stated she did not actually see Mr. Jordan use cocaine. Mr. Jordan has denied the allegations.

Giscard and Schmidt Meet Today for Talks

BONN, Sept. 30 (AP) — President Valery Giscard d'Estaing arrives here tomorrow for two days of talks with Chancellor Helmut Schmidt as part of the regular French-West German consultations.

Accompanying the president will be a delegation of French experts in foreign affairs, economics, industry, education and women's affairs.

In Bid to Get American Planes

U.S. Probes Alleged Plot By Libya to Bribe Aides

The following article is based on reporting by Charles Kaiser, Edward T. Pound and Philip Taubman and was written by Mr. Taubman.

WASHINGTON, Sept. 30 (NYT) — The Justice Department has conducted an extensive, covert investigation for eight months, according to department officials, to determine whether there is an elaborate bribery plot under way designed to secure the approval of the Carter administration for the sale of military and commercial aircraft to Libya.

The investigation, these officials said, has focused on the possibility that Libya conspired with Robert Vesco, the fugitive financier, and others to bribe John White, chairman of the Democratic National Committee, and senior officials in the White House to ensure release of the aircraft.

The Justice Department, according to sources close to the investigation, is almost certain, on the basis of evidence gathered to date, that no bribes were taken by Mr. White or White House officials. The department, the sources said, believes that the scheme could well be a complex confidence game designed to trick the Libyans into providing money for bribes that were never paid.

Mr. White, in an interview, said that he had not been offered any bribes. Mr. Vesco fled the United States nearly a decade ago after he was charged with bilking stockholders out of millions of dollars in an international swindle. He is reported to be living in the Bahamas, and repeated attempts to reach him by telephone and interview him in connection with this investigation have been unsuccessful.

Under Surveillance

The covert phase of the investigation ended late last week when agents of the FBI questioned some persons, including Mr. White. Sources close to the investigation said that Mr. White had been under surveillance during the inquiry.

Mr. White said in the interview that he had been questioned by two agents of the bureau Friday in his Washington office. He said he told them that he knew of no bribery scheme. He said he had been approached in the spring by a political acquaintance who asked if he could help the Libyan representative to the United Nations to get an appointment to see President Carter.

The Libyan, Mr. White said he was told, wanted to discuss relations between the United States and his country and the sale of airplanes to Libya.

Mr. White said he refused to help arrange an appointment. He said he did meet briefly with the Libyan, but was never offered any money to help arrange a meeting with the president or anyone else. Mr. White said that he had suggested that the Libyans contact the State Department. He would not say publicly whether he himself had been in touch with State Department officials.

Billy Carter, the president's brother, has requested from the Justice Department the forms necessary to register as an agent representing Libya. He has made two trips there in the last year, but Justice Department sources said he is not under investigation in the allegations involving Mr. Vesco and the Libyans.

State Department officials said yesterday that no U.S.-made commercial or military aircraft ordered by Libya had been delivered since last fall because of an export ban. Libya currently has orders pending for three Boeing 747 jumbo j eight C-130 cargo planes and Lockheed L-100 cargo planes, ban on the shipment of goods potential military uses stems f the Carter administration's opp tion to Libyan aid to terroris ganizations.

The Libyan government sought for years to get State partment approval for release of planes, some of which Libya paid for.

The Justice Department sa heard about a possible plot fro informant. The informant is sai have told the government tha elaborate conspiracy was under to pay bribes totaling $30 millio get U.S. approval for sale of planes.

The informant told the Ju Department that Mr. Vesco acting as an intermediary for th byans in return for $5 million cording to sources close to th vestigation.

Iran Plans Force Purg

ent assertion of its powers, the gy-dominated Islamic Revolu ary Council revised new Ca appointments made by Mr. B gan.

The supreme policy-ma council, made up of Ayatollah meini's religious aides, appr the appointments after withho ratification in two sessions last total of six hours. The counc tion came despite previous app of Mr. Bazargan's appointm made last week, by Ayatollah meini.

In the southwest today, cou revolutionary guerrillas blew microwave station, cutting off phone communications with country's largest port of Kho shahr and the oil refinery to Abadan, the Pars news agency

The attack, 25 miles from ramshahr on the road to A was the most serious guerrill tion in Iran's oil-rich provin Khuzistan since a number c and gas pipelines were blown July.

Bakhtiar Predicts Collapse

PARIS, Sept. 30 (Reuter Iran's former premier, Shahpu khtiar, repeated today that h lieved Ayatollah Khomeini be swept from power with months. Answering questio the French commercial radio tion Europe One, the shah' premier said, "There are sig plicit enough which show th ure is certain, economically a cially."

Mr. Bakhtiar, who has bee ing in exile in Paris, said he i ed to return to Iran before any throw of the present Islamic go ment.

Ex-Shah Agent Gets 50 La

TEHRAN, Sept. 30 (UPI) former agent of the shah's police paid a $71,000 fine to a revolutionary sentence of lashings but eventually was f 50 times so that he knew how i Pars reported yesterday.

The sentence was ordere Sheikh Sadeq Khalkhali, itin Islamic judge in the Kurdish re since last month's unsuccessful surgency in that area. Sheikh Kh khali declared the man guilty of ture during the shah's regime.

Pope Rules Out Violence, Demands Peace in Irelan

(Continued from Page 1)

danger or a threat," he declared. "My desire is instead that Protestants would see me as a friend and a brother in Christ."

The pope appeared to have avoided the political thickets into which some had feared he would fall when he spoke of the bitter, seemingly insoluble sectarian conflict in the north. He neither condemned conditions in Belfast's Maze Prison, as the British thought he might, nor commented on Irish reunification.

Still fresh after an airport arrival ceremony and a Mass in Dublin's 1,500-acre Phoenix Park that was attended by more than a million people, the pope spoke firmly of the responsibilities of the governments in Dublin and London for changing the conditions that have given rise to violence in the north.

"Do not cause or condone or tolerate conditions which give excuses or pretexts to men of violence," the pope told political leaders. "Those who resort to violence always claim that only violence brings about change. They claim that political action cannot achieve justice. You politicians must prove them to be wrong."

Security for the pope's trip was unprecedented in Ireland's history, but yesterday was a day of joy for Dubliners and for the throng in Drogheda, where relics of Ireland's most recently canonized saint, Oliver Plunkett, executed by the British in 1681, are preserved. No pope had visited Ireland in all the centuries of fidelity and struggle since it was converted 1,500 years ago.

At the airport, at Phoenix Park, in Drogheda and during a motorcade after dark through downtown Dublin, the crowds cheered and waved yellow-and-white papal flags and craned their necks for better views. The pope, smiling constantly, waved at them and blessed them.

Last night, running more than an hour late, he retired to the papal nunciature in Dublin, but only after meeting leaders of Protestant churches in Ireland to re-emphasize his ecumenical commitment.

In his homily at Phoenix Park, the pope criticized the materialism and secularism of the modern world, telling the throng: "The most sacred principles are being hollowed out by false pretenses concerning freedom, the sacredness of life, the indissolubility of marriage, the true sense of human sexuality, and the right attitude towards the material goods that progress has to offer."

Violence Opposed

He paid tribute to the Irish, not only for the work of the early Irish missionaries who evangelized much of continental Europe, but also for their steadfastness in their faith, whether rich or poor, "through days of persecution and vexations."

At Drogheda he turned his attention northward. "This is not, as is so often repeated before world opinion, a religious war, a struggle between Catholics and Protestants," he said. Christianity "is oppposed to fomenting hatred and to promoting or to provoking violence or struggle for the sake of struggle. The commandment 'Thou shall not kill' must be binding on the conscience of humanity if the terrible tragedy and destiny of Cain is not to be repeated."

The Drogheda crowd included tens of thousands of people who had driven from the north to hear to the pope. "Peace cannot be established by violence," he said in one of the most moving passag his address, his English slow a cented but clear and forceful same. "Peace can never flouri climate of terror, intimidatio death. It is Jesus himself wh 'All who take the sword will by the sword.' This is the w God, and it commands this tion of violent men to desis hatred and violence and to re

And again, in a passa dressed directly to the ter "Further violence in Irelan only drag down and ruin th you claim to love and the you claim to cherish. In the n God, I beg you to return to who died so that man might forgiveness and peace. He is for you, longing for each one to come to Him so that He m to each of you: Your sins a given, go in peace."

Today's weather was mor cally Irish — rainy, misty and — but the warm public fer unrelenting. In Galway, 136 west of Dublin, the pope 275,000 Irish youth at a ra Mass against casting aside tional religious precepts in f "the moral sickness that stal society today."

Twice he stabbed at tear the singing, swaying, banner-t youngsters responded with minutes of thundering appla his shout, "Young people Ireland, I love you." The ovati not fade until a priest begg quiet. "We love the pope," chanted. Then John Paul re "I love you" in Gaelic. The d stration erupted anew.

The pope's homily at Kno interrupted when a man sh "Jesus help me, help me" ra within 100 feet of the altar. A dozen Irish policemen tackle wrestled him to the ground a ried him away. A police offic it appeared the man was come" by the drams of pope

Million Copies of Papal Record To Swamp U.S. as Pope Arrives

LOS ANGELES, Sept. 30 — A record of Polish folksongs featuring Pope John Paul II as singer and lyricist is sure to be a smash hit, although it is temporarily unavailable in Boston. Elsewhere, the U.S. release of a million copies of the 42-minute recording is timed so that the records will reach the nation's stores this week when the pope arrives in the United States.

The record, a first in papal history, has already sold "hundreds of thousands of copies" in Europe, according to a spokeman for Infinity Records, sole distributor of the $9.98 record in the United States and Canada. With a million copies pressed and en route to U.S. dealers, "Pope John Paul II Sings at the Festival of Sacrosong" is already among the top pop recordings here.

Initial distribution is nearly twice that of the runaway hit "Saturday Night Fever," which had an original production of 561,000 last year, the Los Angeles Times reported. By April, the latest date for which figures are available, "Fever" had sold 27 million albums, a spokesman for the distributor, RSO Records in Hollywood, said Friday.

Most of the proceeds from the record, cut last June during Pope John Paul's visit to Poland, will go to the National Conference of Christians and Jews and the Pontifical Mission Society, which helps the poor in this country and overseas.

An exclusive marketing deal with the Catholic Archdiocese of Boston, the pope's first stop, will keep the record off retail racks there until three weeks after he returns to Rome, said Ron Alexenburg, president of Infinity Records.

Vietnam Alleges Chinese Attacks

BANGKOK, Sept. 30 (UPI) — Vietnam today accused China of armed attacks "deep inside Vietnam" last week, killing at least three Vietnamese and wounding many others.

Hanoi radio said Chinese troops crossed the border in Hoang Lien Song Province, 150 miles north of Hanoi, on Wednesday and ambushed a Vietnamese patrol, killing two border guards.

Earlier, a company of Chinese troops and militia, about 100 men, pushed one-half mile into Cao Bang Province to the east, "wantonly firing at local people engaged in production work," the broadcast charged. It said the Chinese were driven back across the border.

Typhoon Slashes Japan

TOKYO, Sept. 30 (UPI) — A typhoon designated Owen today cut across Japan's smallest main island of Shikoku, caused damage to houses on southern and outlying islands and whirled toward the business and industrial center of Osaka. There were no reports of casualties.

Speech to Labor Supporters

ennedy Hints He'll Run, rings Cheers in Boston

By Bernard Weinraub

STON, Sept. 30 (NYT) — Sen. ard Kennedy, D-Mass., indicat- a wildly cheering labor audi- on Friday that he was plan- to announce his candidacy ly for the 1980 Democratic idential nomination.

n. Kennedy, waving and grin- , responded to the presidential orsement of the Massachusetts e Labor Council of the AFL- with the comment:

You'll be hearing about my re- nse to that resolution in the days weeks to come, and I don't k you'll be disappointed."

he audience of 1,000 applauded, tled and stood on their chairs he cramped ballroom of the Plaza Hotel in Boston. Later Kennedy, flanked by labor of- ls, held aloft and waved a yel- and-green sweatshirt that read: nnedy in 80."

Firmest Statement

n. Kennedy's comment on Fri- was his firmest public state- t so far that he will become a ared candidate for president challenge President Carter for Democratic nomination. As Kennedy left the hotel, he told rters that no date had been set a public announcement of his idacy.

he ebullient labor audience, nting "We want Teddy," heard Kennedy deliver his strongest k to date on the Carter admin- ation.

People would have us believe the problems of inflation are difficult, too complex to come grips with," said Sen. Kennedy. ell, I don't believe that to be the e."

Without naming Mr. Carter, Sen. nnedy cited the problems of ris- unemployment and inflation. "I d people don't really understand y we can't have action on these blems."

"During the Depression," Sen. nnedy said, "we didn't say the blems were too complex or too p. We didn't say the American ple are in malaise. We said let's me to grips with our problems."

Blunting Image

he same theme was sounded later in the day in a speech to Massachusetts Bar Association. s said that the speech, which ded proposals to tighten the inistration of federal social pro- s and combat fraud and cor- n in an array of government cts, was designed, essentially, unt the image of Sen. Kennedy doctrinaire liberal who favors y spending of government s on social programs.

n. Kennedy's speech was de- d, according to one aide, to e him into the center."

e highlight of the day, howev- as Sen. Kennedy's 35-minute arance before the audience of trade union men and women, many of whom wore "Kennedy in 80" buttons. Sen. Kennedy said it was a virtual tradition in the Kennedy family to address the State Labor Council. His brother, John F. Kennedy, first addressed the group in 1946 when he was running for Congress, Sen. Kennedy said.

Sen. Kennedy lashed into statements by Carter administration officials that the heating bills of needy people will be relieved this winter by the payment of a windfall profits tax from oil companies.

eneral Said to Surrender fter Mutiny in Argentina

From Agency Dispatches

ENOS AIRES, Sept. 30 — A ist general who staged a blood- evolt against army commander Roberto Viola for alleged soft- on Marxists surrendered early y, the army command said. Luciano Menendez decided to up after an hourlong meeting Gen. Viola at army headquar- ere.

n. Menendez arrived aboard a ary plane from Cordoba, where d refused to recognize an or- y Gen. Viola yesterday reliev- im as commander of the pow- 3d army corps, which controls rovinces in northwestern Ar- a.

n. Viola fired him and ordered o report to headquarters after Menendez called for Gen. Vi- esignation, accusing him of soft on subversion and of firmness in his command of y. Refusing to accept the or- Gen. Menendez, 52, asserted that "I still command the 3d corps," and holed up with a group of supporters in a mountain town outside Cordoba.

The meeting with Gen. Viola was arranged late last night as troops loyal to Gen. Viola poured into Cordoba from neighboring provinces. After the meeting, a command communique said today that "as a consequence of the meeting, the former commander of the 3d army corps surrendered." The situation of troops in the 3d corps was expected "to return to normal under orders from their [new] commander, Gen. Jose Vaquero," the communique said.

Army sources said that Gen. Menendez, who had commanded the 3d corps since 1975, was given guarantees that he would be allowed to return to Cordoba regardless of the outcome of the meeting with Gen. Viola. After the meeting he flew back to Cordoba.

Arizona Governor Ordered Transfer

U.S. Guardsmen Remove Disputed Radioactive Gas

By Molly Ivins

TUCSON, Ariz., Sept. 30 (NYT) — A convoy with a helicopter escort rolled across Arizona yesterday carrying 42 barrels of radioactive tritium to an Army depot 20 miles west of Flagstaff.

After a judge reversed a decision to block the move, the convoy departed from the American Atomics Corp. plant in Tucson at 2 a.m. with the barrels of tritium inside a 15,000-pound nuclear materials container with walls a foot thick. It left behind neighbors who are both fearful and relieved, company employees who are both angry and bitter and a general public that is thoroughly confused. There is also a plethora of lawsuits.

Gov. Bruce Babbitt, saying he was convinced that the material in the plant was a menace to public safety, declared a state of emergency and sent the National Guard in to clean out the plant. The company's officers say the plant was a victim of "radiophobia," defined by one as an hysterical fear of radioactivity fanned by the accident at the Three Mile Island nuclear plant.

"This whole emergency," said Harold Warnock, attorney for American Atomics, "is the result of Gov. Babbitt's desire to run for the Senate and of his greed for publicity. It was a purely political decision.

"He acted under a statute that talks about earthquakes, pestilence and the Four Horsemen of the Apocalypse. The AEC said a week ago that a portion of the tritium in the plant could be processed and released to customers and that was where the matter stood when the governor decided to grab a little publicity."

Mr. Babbitt, who is serving on the presidential commission investigating the Three Mile Island accident, called the situation at the plant "intolerable" and "the most outrageous radioactive emission in the United States."

Last fall there was one accidental release when an employee turned the wrong valve, releasing 21,000 curies of tritium, which is a radioactive form of hydrogen that the company used to make glow-in-the-dark watch faces and signs. That is about 10 times the amount of radiation released by a nuclear power plant operating under normal conditions.

The company has acknowledged that some of its tritium was unaccounted for each day, but because there is no comparable manufacturing facility it is difficult to determine if the plant was carelessly operated. After hearings this summer, the state nuclear agency made no finding of negligence.

Last spring, tests found a piece of chocolate cake made in the main kitchen of the Tucson Unified School District, which is across the street from the plant, that contained 56,000 picocuries per liter. The Environmental Protection Agency has set a standard for safe drinking water of 20,000 picocuries of tritium per liter.

Alarmed at the idea that cake for school children contained more than twice the tritium considered safe in drinking water, the school district closed the kitchen for the last few days of the school year. The kitchen is still closed, although the environmental agency said in a letter to the state that the drinking water standard is not applicable to food.

Radioactive Leak

FLAGSTAFF, Ariz., Sept. 30 (UPI) — A small amount of radioactive tritium gas escaped from a nuclear materials container convoyed by the National Guard yesterday from an atomic plant seized by the state.

Darrell Warren of the Arizona Atomic Energy Commission said that jostling over rough roads from the Tucson plant to the Navajo Ordnance Depot near Flagstaff may have caused a crack or dent in the container.

Poland Queried On UN Worker

UNITED NATIONS, N.Y., Sept. 30 (AP) — Three organizations claiming to represent about 14,000 international civil servants appealed Friday to Poland to let UN officials see a Polish UN employee arrested on spy charges and being held incommunicado in Warsaw.

Their message said that Alicja Wesolowska, whom the UN Development Program was sending from New York to a new post in Ulan Bator, Mongolia, had been detained in Warsaw without contact with family or colleagues since Aug. 10. They asked that the Polish government either free her or else give a UN representative access to her.

They also asked that Poland supply the United Nations with details of the charges that led to her arrest, provide her with a lawyer of her choice and admit UN legal observers to any trial that might be held.

Quebec Poll Finds Most Reject Separation

By Henry Giniger

OTTAWA, Sept. 30 (NYT) — One of the most exhaustive polls yet made of Quebec opinion indicates a majority rejects independence and separation from Canada but would be willing to give the present secessionist government a mandate to negotiate a new association of sovereign states.

The poll, commissioned by the government in June, indicated extreme confusion among the public as well as an unwillingness to accept the risks that would be involved in independence. The poll also revealed that what Americans think weighs heavily in Quebec. Almost 40 percent of those polled think the United States does not favor the government's proposal of sovereignty-association and 60 percent think this opinion is important.

Slightly more than 1,000 persons were interviewed for more than an hour in their homes and answered 102 questions. The results were released Friday in Quebec City by Claude Morin, minister of intergovernmental affairs. He is the chief architect of the government's proposal to end Quebec's federal ties and replace them with a form of sovereignty that would be limited by a close association with the rest of Canada.

This proposal will be submitted to the people in a referendum next spring. Mr. Morin said the poll's results showed that the government was on the right track since they indicated a clear desire by Quebecois for change. But adversaries of the government also drew comfort from the poll since it also tended to support their view that support for federalism was still strong.

When asked their preference for a political status, 39 percent of the respondents said they wished a "renewed federalism" and only 19 percent said they favored the proposed sovereignty-association. Nine percent supported independence.

But 54 percent answered affirmatively when asked if, rather than giving outright support to sovereignty-association, they would prefer to give the government a mandate to negotiate such sovereignty-association with the rest of Canada.

Legislator Is Killed In Naples Shooting

NAPLES, Sept. 30 (AP) — A Socialist member of Parliament, Luigi Buccico, was killed in a street shooting yesterday. Police termed the slaying a romantic-triangle vendetta and ruled out a political motive.

The gunman, who was arrested, fired pistol shots at deputy Luigi Buccico in front of a bar in the Fuorigrotta neighborhood of Naples.

Kennedy Views, Character Attacked by Republicans

By Adam Clymer

INDIANAPOLIS, Sept. 30 (NYT) — Republican presidential candidates and other party figures took turns kicking Sen. Edward Kennedy around yesterday on everything from his political philosophy to his character, and they won applause from the 2,500 members of the National Federation of Republican Women.

But the presidential hopefuls also found that they may have to share the already crowded Republican spotlight with another would-be Republican candidate, Gen. Alexander Haig Jr., former NATO commander, who said he was quite close to deciding to run and indicated that until recently he had been a registered Democrat.

The attacks on Sen. Kennedy began when Sen. Bob Dole of Kansas told the convention audience that President Carter's rival was "the last New Dealer."

Sen. Howard Baker Jr. of Tennessee said he was not sure that the Massachusetts Democrat could take the nomination from Mr. Carter. He said, "There will be blood on the floor." But he indicated that he relished a race against Sen. Kennedy. "If there's a man in the Senate who represents the tired old theories of the 1930s and the Depression mentality, it's Teddy Kennedy, and we'll beat the socks off him," he said.

Anne Armstrong, former co-chairman of the Republican National Committee, White House counselor to President Nixon and ambassador to Great Britain, predicted that serious questions would be raised about Sen. Kennedy's character as he ran for the presidency. She accused Mr. Carter of vacillating rather than pressing this issue.

"The American people will consider not only their right but their duty to scrutinize the character of the candidates, every bit as much as they scrutinize the issues," she said.

Gen. Haig said at a news conference that he did not want to criticize Sen. Kennedy at this time, and his speech to the convention concentrated instead on attacking "blatant illegal Soviet interventionism" around the world and the Carter administration's alleged failure to prevent or challenge it.

But at the news conference where Gen. Haig indicated he was likely to run, he said it was subjective to say whether or not his service as President Nixon's chief of staff during the Watergate controversy would help or hurt him as a presidential candidate.

"I think the American people recognize public servants, in or out of uniform when they are asked to perform duties and responsibilities, don't have the luxury of putting up their fingers and testing whether or not it's going to be good for their careers or reputations or their future advancement."

When asked if he had been registered to vote, and if so, as a Republican, for many years, he said he had voted before but had only registered Republican since leaving the Army. "I had been an independent in my own mind, not a registered independent," he said, implying strongly that he had been a registered Democrat. He said he had always "supported the man, and until leaving the Army had not been a party advocate."

Reagan Seeks TV Time

MERRIMACK, N.H., Sept 30 — Ronald Reagan said on Friday that if he can buy 30 minutes of prime-time television, he plans to announce his decision on Nov. 13 about running for president for the third time.

The 68-year-old former governor of California, who ran in 1968 and again in 1976, said he could not say he has decided to run next year, but he jokingly warned a private meeting with his supporters here, "don't you commit to anyone else," pending his announcement.

House-Senate Clash Leaves Federal Bureaus Unfunded

By Spencer Rich

WASHINGTON, Sept. 30 (WP) — The federal government heads into a new fiscal year tomorrow without funding for most agencies and departments because of a dispute between the House and Senate over abortions for low-income women and congressional pay raises.

Although the Senate met yesterday, leaders had no immediate solution and put off any action until tomorrow. The House, meanwhile, is on vacation until Oct. 9 and President Carter reportedly has no plans to call it back before then.

Although most agencies will not legally be able to pay out or commit funds, employees and creditors probably will not feel the bite for a few weeks, by which time the dispute in all likelihood will be settled and funding approved.

The problem started late Friday after the leaders of the two Appropriations Committees thought they had worked out a deal to provide funding for the government agencies, allow a 5.5-percent House-passed pay increase for Congress, 22,000 top federal employees and judges, and accept some Senate loopholes in the ban on free federal abortions for low-income women.

Congressional Gamble

When the House took up the compromise on the funding resolution, it junked the Senate abortion plan in favor of a stricter ban, left the 5.5-percent raise in place and promptly went home for 10 days. Members gambled that the Senate would swallow this action and endorse the House position in order to avoid cutting off funds for federal agencies.

But senators, furious at the House action, killed the entire bill by a 55-to-9 vote late Friday, accusing the House of what Sen. Edmund Muskie, D-Maine, called "legislative blackmail."

The result of this action is to permit a 12.9-percent cost-of-living raise, put in place by earlier legislation but so far blocked by Congress in favor of the 5.5-percent proposal, to come into effect automatically at midnight tonight.

Senate leaders said yesterday this is so large that they intend to move to rescind it this week for Congress and the 22,000 high-level federal employees, but not for judges, since the Constitution bars reducing the pay of a judge.

Senate Majority Leader Robert Byrd, D-W.Va., said yesterday that the Senate, rather than yielding to the House, will take up a minor emergency appropriations bill and attach to it continued funding for federal agencies and the Senate abortion plan, but no pay raise for Congress.

It will then be up to the House to act when it returns.

Budget Proposals Unveiled by New Italian Cabinet

ROME, Sept. 30 (AP) — The seven-week-old government of Premier Francesco Cossiga unveiled a set of 1980 budget proposals last night that was somewhat more expansionary than expected.

The Cabinet presented a package including tax cuts for workers and plans to spend 3 trillion lire ($3.6 billion) to boost the housing industry.

Such measures would help lift the economic growth rate next year to 2.5 percent instead of 1.5 percent as originally forecast, ministers said. That would still represent a substantial decline from 4.5 percent predicted for this year and is below the target of at least 4 percent in last year's three-year plan for the economy.

The government said it would boost tax exemptions by 50 percent for hourly workers, which would cost it 1.2 trillion lire ($1.44 billion). It made the proposal after union leaders threatened to call a national strike for lower taxes.

Unions said the tax cuts were not large enough and said they wanted a reduction for 1979 as well. Labor leaders and government ministers are scheduled to meet Oct. 9 for further discussions.

Associated Press

At the end of his walk across the United States, Capt. Francis de Barbeyrac is met by Michel Rougagnou (left), the French consul general in Los Angeles, and Col. Jean Morville (right).

French Captain Ends 3,000-Mile Walk Across U.S.

LOS ANGELES, Sept. 30 — Barely sweating or breathing heavily, they could have been any pair of seasoned joggers out for a morning run along the oceanfront in the Venice section of Los Angeles.

Except that Capt. Francis de Barbeyrac of the French Army — accompanied by his wife, Monique — was ending a walk of nearly 3,000 miles across the United States.

"Two years ago I crossed Australia and I do each day 40 miles," he said after he finished the journey Friday. "I wanted to test my limits, to see exactly how far I could go. America is a big country."

Capt. de Barbeyrac, 30, said that he started training two years ago for his trek from the Atlantic to the Pacific. He stepped from the ocean at Virginia Beach, Va., on Aug. 6 to begin a journey with his wife and three other joggers that took 52 days, 18 hours and four pairs of tennis shoes.

If made official, Capt. de Barbeyrac's time would better the record of John Lees of Britain by more than 18 hours. Lees walked 2,876 miles from City Hall in Los Angeles to City Hall in New York in 1972.

Each day, Capt. de Barbeyrac rose at 4 a.m. and alternately walked and jogged until 1:30 p.m., when he napped for two or three hours before getting up to walk and run again, sometimes until midnight.

Capt. de Barbeyrac's wife ran with him two or three miles a day. Each of the other three joggers accompanied him for about 20 miles of his average daily 60-mile total.

Capt. de Barbeyrac, a paratrooper, is on leave from the French Army Overseas Forces. He was given about $5,000 by the French Defense Ministry to subsidize his journey.

Panel Told Shcharansky Dying in Jail

From Agency Dispatches

WASHINGTON, Sept. 30 — A lawyer for imprisoned Soviet Jewish dissident Anatoly Shcharansky told an international tribunal on human rights yesterday that Mr. Shcharansky is dying and urged his release.

In another plea at the International Sakharov Hearings here, Alexander Solzhenitsyn urged world organizations to help free Russia's "forgotten Christian" prisoner, Igor Ogurtsov, imprisoned since 1967. The appeal was read by Mr. Solzhenitsyn's wife, Natalya.

Publisher Robert Bernstein of Random House pleaded for the freeing of ailing Soviet dissident, Yuri Orlov, the founder of a Soviet human rights group that has been nominated for the Nobel Peace Prize.

The pleas by Mr. Bernstein, Mr. Solzhenitsyn and Canadian lawyer Joseph Pomerant were made on the final day of the hearings, named for Soviet dissident and Nobel Peace Prize winner Andrei Sakharov.

Mr. Solzhenitsyn called the 20-year sentence meted out to Mr. Ogurtsov "murder, almost brought to completion." Mr. Ogurtsov, 42, founded the "All Russian Social Christian Union for the Liberation of the People" in 1964. Three years later he was sentenced.

"Anatoly Shcharansky is 31 and by all objective and personal accounts is dying," Mr. Pomerant told the more than 500 persons in a Senate hearing room.

Mr. Pomerant said the latest information on Mr. Shcharansky's health came from a visit by the dissident's mother to Chistopol Prison in August and from talks later with Mr. Shcharansky's brother, Leonid, in Moscow. His mother, Ida Milgrom, had reported that "Tolya is skin and bones. His face is drawn. He looks like an inmate from a concentration camp. There is no doubt he is a sick man."

The Canadian lawyer has been retained in the West to represent Mr. Shcharansky, who was sentenced in July, 1978, to three years in prison and 10 years in a strict labor camp for anti-Soviet agitation, propaganda and treason.

Urging Mr. Shcharansky's release, Mr. Pomerant warned that the Russians "only act when it is in their interest."

Mr. Bernstein said Mr. Orlov, too, was ill because of being forced to work on a lathe in prison and then having his food rations cut when he could not fulfill his work norm. Mr. Orlov, 52, established the Moscow Helsinki rights watch group in 1976.

On Friday, Alexander Ginzburg, a dissident in exile, read a letter from Mr. Orlov's wife, Irina, saying that heavy work at the camp was severely damaging the physicist's health.

The hearings ended with a plea for freeing Vladimir Shchelkov, 84, a Seventh-Day Adventist who was jailed for five years at hard ... He was sentenced five months for circulating information de... ing the Soviet state, but his crime was his religious activ... Daniel Ross, a lawyer of the C... mittee for International R... said.

Pei Named to Design U.S.'s China Embassy

PEKING, Sept. 30 (AP-DJ) — The U.S. State Department has appointed architect I.M. Pei to design an embassy, an ambassador's residence and an apartment building to house embassy personnel in Peking, the Asian Wall Street Journal reported.

The present embassy, which was only a liaison office before diplomatic relations were established Jan. 1, is considered too cramped. Its staff has grown from about 36 persons to 60 and will increase to more than 70 by the end of the year.

Spain Policeman Mistakenly Slain By Civil Guards

The FL 20. A rugged and reliable crawler loader.

Fiat-Allis versus tough competition in setting tough standards.

Fiat-Allis has built Europe's most advanced factory for crawler dozers and loaders, at Lecce in the South of Italy.

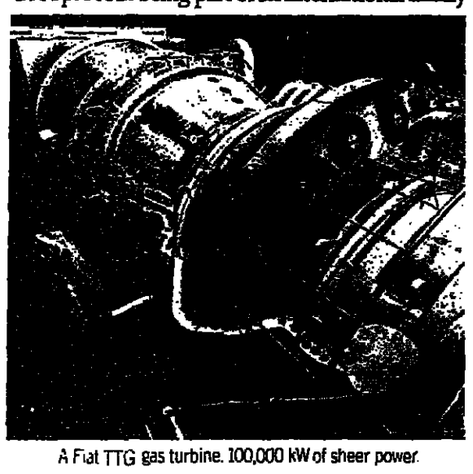
We have thoroughly automated our production facilities in Europe and North and South America, and invested heavily in new technology.

All this to make certain that when a machine comes off the Fiat-Allis production line, it's a higher-quality machine. Built to last longer. To work harder. And to make life easier for the men who are going to live with it.

Take the 235 HP Fiat-Allis FL 20. With its new and original frame design, it is one of the most powerful crawler loaders on the market.

The Fiat Group: A 15 billion dollar a year company.

More than a few Fiat-Allis engineering advantages come from being part of the Fiat Group. From being part of an international family



A Fiat TTG gas turbine. 100,000 kW of sheer power.

that has a net sales income of over 15 billion dollars, has 200 production plants and employs 330 thousand people.

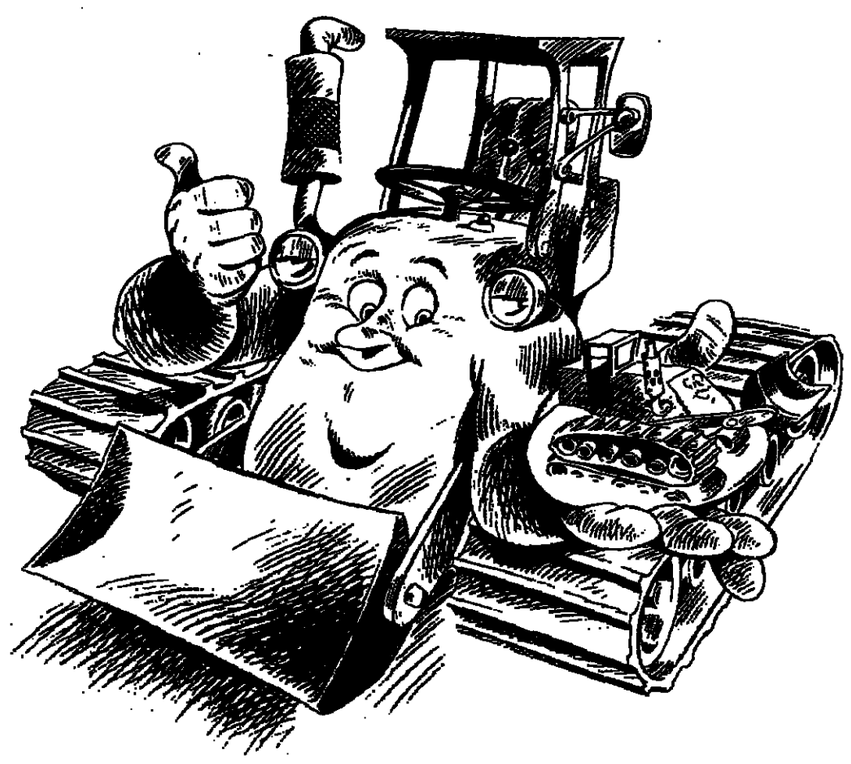
The Fiat Group has proven its engineering expertise in fields as far apart as cars and energy production, aircraft and farm tractors, trucks and marine engines, railway rolling stock and machine tools.

And there's a lot of Fiat in Fiat-Allis.

We are not the biggest in the business, and we have a great deal of respect for our competitors and for the machines they build.

But we think that ours are hard to beat.

You're the judge.



FIAT-ALLIS

MINUTE

A one-minute call can mean a low-cost call back home.

You'll be surprised how many wonderful messages you can crowd into a one-minute call. Like, "Having a wonderful time," "Wish you were here," and "I love you." Just enough to let them know you care. Why one minute? Because there's usually no three-minute minimum calling charge in Europe if you dial the call. (Or if your hotel operator dials it.)

The minute call can also save you money if you want to talk longer. Dial a short call and have them dial you back. If you're dialing from a hotel, you save on surcharge fees, and you pay the cost of the call-back in dollars when you get your bill back home.

MINUTE. The call they'll remember for years.

Party Reassesses Recent History

China Calls Moves by Mao 'Catastrophe'

By Fox Butterfield

PEKING, Sept. 30 (NYT) — In a speech yesterday for the 30th anniversary of the People's Republic of China, Yeh Jianying, senior deputy chairman of the Communist Party, offered a candid new version of recent history conceding that the Communists made a series of errors culminating in the Cultural Revolution.

"It was an appalling catastrophe suffered by all our people," Mr. Yeh said of that tumultuous period in the late 1960s. Earlier last week, the People's Daily, the party newspaper, said that the Cultural Revolution adversely affected 100 million Chinese.

Mr. Yeh's address to an audience of 11,000 in the Great Hall of the People appeared to clear the way for the posthumous rehabilitation of Liu Shaoqi, the head of state purged in the Cultural Revolution.

In his two-hour report, Mr. Yeh did not mention Mr. Liu by name, but in reciting policy errors by the party in the late 1950s and in the 1960s, he seemed indirectly to exonerate him.

Aging Officials

Mr. Yeh's speech came a day after the end of a meeting of the party's Central Committee, which approved it. The committee promoted 2 aging officials, all victims of the Cultural Revolution, to the Central Committee, and named two new leaders to the party Politburo, the key decision-making body.

They are Peng Zhen, a mayor of Peking before he was toppled in the Cultural Revolution, and Zhao Ziyang, party first secretary of Szechuan province. Both are considered close associates of Deng Xiaoping, the deputy premier, and share his pragmatic, development-minded philosophy.

None of the members of the hierarchy who have been under veiled criticism for their close relations with Mao Tse-tung and his radical followers were dropped by the party at the meeting. This suggests that a compromise reached after Mao's death "to add to but not subtract from" the Politburo, so as to preserve stability, still holds.

Nonetheless, the appointments further tilt the balance of power toward Mr. Deng. His predominance was underscored by Mr. Yeh's repeated emphasis that China must now "seek truth from facts," one of Mr. Deng's most cherished concepts. It means to take a realistic, nondogmatic approach, particularly toward Mao's legacy.

The candor of Mr. Yeh's report reflects another of Mr. Deng's themes, the need for Chinese to "emancipate" their minds after the severity of the last decade. As an indication of China's growing openness and confidence, the diplomatic corps and foreign journalists were invited to attend yesterday's ceremony.

It was believed to be the first time non-Communist foreigners had been allowed to attend a Communist Party or government meeting since 1949. Earlier last week, reporters were given briefings on China's economy, agriculture and culture by ranking officials — also highly unusual.

Mr. Yeh, who is 80 and had to be helped to his place on the rostrum, read only the first 10 minutes of his long speech. The entire membership of the Central Committee sat behind him, facing the huge audience in the curving hall, which was decorated with giant red flags and banks of poinsettias.

Not a God

Mr. Yeh, who is chairman of the National People's Congress, China's nominal legislature, began his report with a list of accomplishments: Industrial production has grown by an average of 11.2 percent since 1952, China now has 210 million students, and Peking has diplomatic relations with 120 countries.

Regarding Mao, Mr. Yeh repeated the now generally stated view that the chairman was a great man, not a god, whose guidance was indispensable to the success of the revolution before 1949. But he added: "Mao Tse-tung's thought is not the product of Mao Tse-tung's personal wisdom alone. It is also the product of the wisdom of his comrades in arms."

The vigor of Mr. Yeh's judgments on the history of the last 30 years surprised some diplomats, since at the last party session, in December, it was announced that no verdicts would be reached for some time. But "it is necessary to make a preliminary assessment," Mr. Yeh explained.

Without referring to Mr. Liu, the former chief of state, Mr. Yeh said that the eighth party congress, in 1956, had been entirely correct. Mr. Liu presented the political report at that meeting, which was denounced at the next congress in 1969, during the Cultural Revolution, when Mr. Liu was expelled from the party.

On the anti-rightist campaign against intellectuals, which followed the short-lived One Hundred Flowers movement in 1957, Mr. Yeh acknowledged that it went too far. Similarly, he said that in the Great Leap Forward in 1958, during which Mr. Liu opposed Mao, "we made mistakes in giving arbitrary directions, being boastful and stirring up a Communist wind."

But Mr. Yeh reserved his most trenchant remarks for the Cultural Revolution itself, which was launched, he said, at a time when "the assessment made of the situation within the party and the country was counter to reality." The result of the Cultural Revolution, Mr. Yeh said, was "bloodbaths and terror." He did not say what everyone in the audience knew — that Mao initiated the Cultural Revolution to overthrow his enemies in the party.

Cambodian Front Re-Elects Samrin Amid Reshuffle

BANGKOK, Sept. 30 (UPI) — Cambodian President Heng Samrin today was re-elected head of the National United Front, the Vietnamese-backed grouping that took over when Khmer Rouge government of Pol Pot was ousted.

Heng Samrin and Vice President Chea Sim were the only two leading members of the front — officially called the Kampuchean National United Front for National Salvation — to retain their positions, the news agency SPK said. There was no mention of those who were dropped, including Economy Minister Ros Samay.

The other six leading members were new and SPK said the Central Committee of the front included a number of intellectuals and diplomats from former governments.

The government today also made the first official announcement that it will allow international aid agencies to mount a large-scale relief program for its sick and hungry people.

Sihanouk in Peking

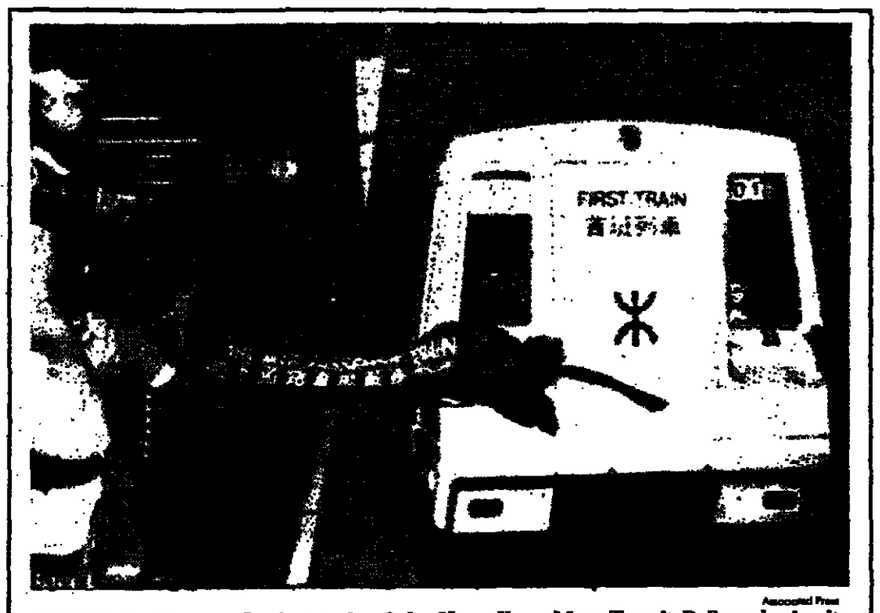
PEKING, Sept. 30 (UPI) — Prince Norodom Sihanouk, the former Cambodian chief of state, arrived here yesterday from exile in North Korea to attend the 30th anniversary commemorations.

Prince Sihanouk was deposed in 1970, but returned to Cambodia after the Communist victory over U.S.-backed forces in Phnom Penh in 1975. He left the country again when Vietnamese troops toppled the Pol Pot regime early this year.

Art Exhibition Closed

PEKING, Sept. 30 (Reuters) — Police yesterday closed an unofficial open-air art exhibition organized by a group of young artists in a park near the Peking Art Gallery. Exhibitors were told that the show interfered with the "normal activities of the masses."

The exhibition began on Thursday with about 150 paintings hung from ropes tied between trees in the park. Foreign witnesses said the police refused to let the artists to put them up yesterday morning.



Associated Press

OPENING DAY — The first train of the Hong Kong Mass Transit Railway begins its maiden 8-kilometer trip in Hong Kong's twin city of Kowloon. The remaining 7.6 kilometers of the subway, including a Kowloon-Hong Kong tunnel link, will be completed in February.

Ohira Excise Tax Plan Hurts Campaign

By William Chapman

TOKYO (WP) — When Premier Masayoshi Ohira dissolved the lower house of parliament for new elections earlier this month, it was a safe bet that his Liberal Democratic Party would win the seats it needs for a solid working majority.

His LDP was enjoying unaccustomed popularity in public opinion polls. The opposition, especially the Socialists, was losing ground. Working in Mr. Ohira's favor were a strong business recovery and a low rate of inflation, usually an unbeatable combination.

Then the spotlight focused on Mr. Ohira's plan to impose a new general excise tax on Japanese consumers and the optimism ebbed sharply. The tax, similar to a European-style value-added tax, was first proposed months ago but got little attention until voters and Mr. Ohira's own party leaders began calculating what it would mean — a sharp rise in consumer prices next year.

LDP candidates began running for cover. In Tokyo, Kaoru Yosano, a young candidate running for reelection, told a crowd waiting to hear Mr. Ohira, "I will fight with my whole political life to prevent the tax increase by all means, during the election and after the election." Mr. Ohira arrived a few minutes later and delivered a ringing endorsement of Mr. Yosano without mentioning taxes.

Later, in an interview, Mr. Yosano complained about the effect the tax proposal was having on his campaign. "It's not just hurting," he said, "it's ruining." Tokyo's small businessmen are especially upset, he said.

The issue, however, is playing into the hands of opposition politicians. Socialist Party chairman Ichio Asukata, battling to save his legislative seat, has strongly opposed the tax. He warns that, in lieu of the tax, the government plans to raise regular income taxes by 20 percent on workers earning about $700 a month. "Is that alright with you — to pay 20 percent more in taxes?" he asked his followers.

Mr. Asukata said his audiences this fall are double the size of those in the last campaign. "I don't think this is because I am popular," he said. "I think that people are conscious of the tax issue."

A Mainichi newspaper poll found 72 percent of the population against introduction of the tax, and, more ominously for Mr. Ohira, many LDP party members are defecting on that issue. Toshio Komoto, chairman of the LDP policy affairs research council, said the tax will not be necessary and that 60 percent of party members are against it. More than 200 LDP members of parliament joined an ad hoc association devoted to opposing the tax.

It was a bitter pill for Mr. Ohira. He had long argued that the excise tax is necessary to reduce the government's chronic and growing revenue deficits and a party resolution had endorsed a plan to introduce it next year. Although some newspapers praised him for facing the issue realistically, Mr. Ohira has begun to amend his comments to flow with the tide.

First, he said the tax might be imposed only for a short time. Then he said he is not sure yet — and won't be until after the election — whether it will be needed at all. Perhaps, he added, an increase in regular income taxes would suffice.

The debate has cast a dark cloud over Mr. Ohira's effort to win control of parliament. His LDP has been Japan's dominant party for 25 years, but in recent years has governed with so thin a majority that it lacks effective control over the lower house. At the time that Mr. Ohira dissolved the chamber on Sept. 7, the LDP had a two-vote majority.

His goal this fall is 271 seats — the party now has 248 — which would be enough to obtain majorities on all standing committees, including the crucial budget committee, and also enough to end the need for constant negotiations with opposition parties.

Two weeks ago the prospect looked bright. A poll in the Asahi newspapers found that 52 percent of the people back the LDP although support for Mr. Ohira's Cabinet was declining.

Also at stake in the election is Mr. Ohira's personal future. Elected party president and premier last winter, he lacks the factional power that is enjoyed by other party leaders, including former premiers Takeo Fukuda and Kakuei Tanaka. Before the tax issue, Mr. Ohira was expected to gain adherents to his faction.

Burma Drops Membership In Nonaligned Movement

UNITED NATIONS, N.Y., Sept. 30 (AP) — The nonaligned movement, enlarged from 88 to 95 members at the Havana summit conference earlier this month, has fallen back to 94.

Brig. Gen. Myint Maung, the Burmese foreign minister, told the General Assembly on Friday that "Burma has ended her participation in the nonaligned movement" because the conference ignored a motion he submitted aimed at purifying the movement.

Speaking in the assembly's policy debate, he said, "Burma went to Havana with hopes that the principles which had inspired the founding of the movement could be preserved and given new life" but "what happened at the conference only disappointed and disillusioned us."

He said that Burma's "urgent motion" would have had the conference name a drafting committee to define the "inviolable principles" of the movement, qualifications for membership, powers of its principle organs and their procedures so that it could make a new start "purified and renewed."

Burma warned then, he said, that, if the conference did not reach a decision on the motion but let things drift, it would quit the movement.

Left Conference

Burma left the extended conference the day it had been scheduled to end, but he said it "failed to take heed of our motion and concluded without even a mention of it."

"Burma's decision to end her participation in the nonaligned movement therefore become operative from the end of the summit conference," he said, "and Burma stands by that decision."

At the conference, Cuban President Fidel Castro as the presiding officer proposed a declaration identifying nonaligned countries as the natural allies of the Soviet bloc but eventually accepted Yugoslav and Indian amendments pulling it back to traditional middle ground.

Burma was an original member of the movement, which was founded in 1961. Members added in Havana are Iran, Pakistan, Nicaragua, Bolivia, Suriname, Grenada and the Rhodesian Patriotic Front.

Cigarette Suspect In Vienna Fire

VIENNA, Sept. 30 (UPI) — A burning cigarette in a wastepaper basket is believed to be responsible for the hotel fire that claimed the lives of 26 tourists in a Vienna hotel, authorities said yesterday.

Fire brigade officials said they have determined almost beyond doubt that the fire originated in a wastepaper basket in the ground floor reception area of the Hotel Am Augarten, a 100-year-old building. It is believed that a burning cigarette caused the fire in the reception area which then spread rapidly through the four-story hotel.

The overnight reception man was among the first victims, authorities said.

Bulgarian Chief in Hanoi

BANGKOK, Sept. 30 (AP) — President Todor Zhivkov of Bulgaria conferred today in Hanoi with Le Duan, the Vietnamese Communist Party leader, the Vietnamese news agency reported.

U.S. Gives Yugoslavs $10 Million in Aid

WASHINGTON, Sept. 30 (UPI) — The U.S. Agency for International Development announced a reconstruction grant of $10 million to Yugoslavia yesterday to help repair damage from last April's earthquake in the Montenegro region in which 100 persons were killed, 1,000 injured and about 100,000 left homeless.

The funds will be used to rebuild schools and health care facilities and for the importation of equipment. Immediately after the April 15 quake, the United States sent $1.3 million worth of blankets, tents and water purification units to the scene.

Soviet Envoy Appointed

MOSCOW, Sept. 30 (AP) — Anatoly Ivantsov has been appointed as the Soviet ambassador to Ghana, succeeding Yuri Bernov, Tass reported today.

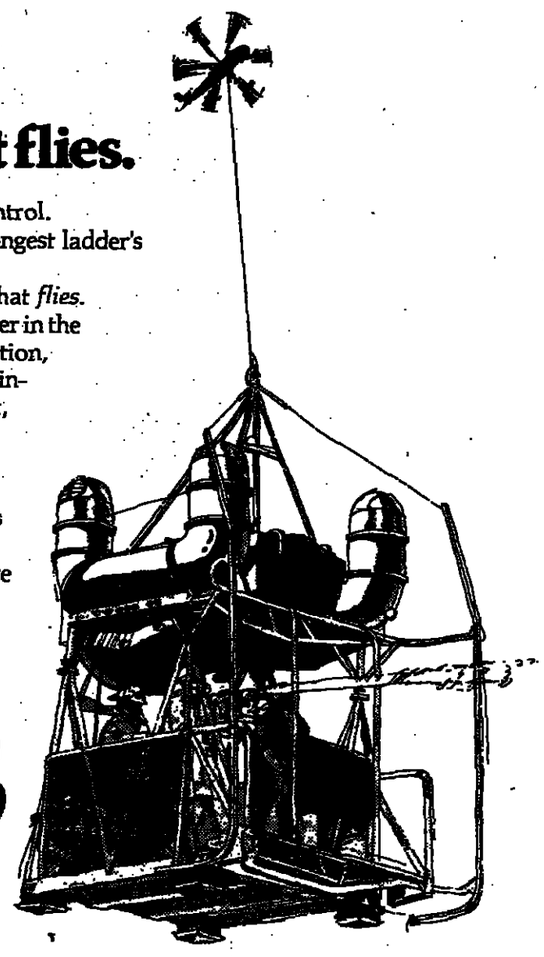
A fire engine that flies.

Thirty stories up, a fire rages out of control. Dozens are trapped beyond even the longest ladder's reach. But not beyond hope.

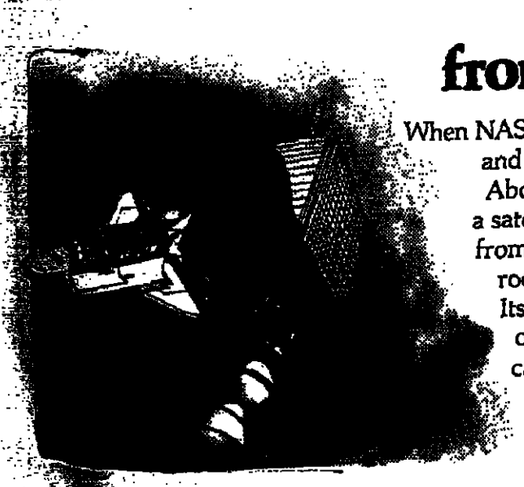
Because now there's a fire engine that *flies*. Suspended from a helicopter, this lifesaver in the sky can move horizontally in any direction, under its own power. It can dock at a window, unload firefighters and equipment, and carry victims to safety.

With this versatile vehicle, emergency teams can make rescues down narrow ravines, along rugged coastlines or in a remote mountain wilderness.

The McDonnell Douglas Flying Fire Engine. An idea in flight that could one day save your life.

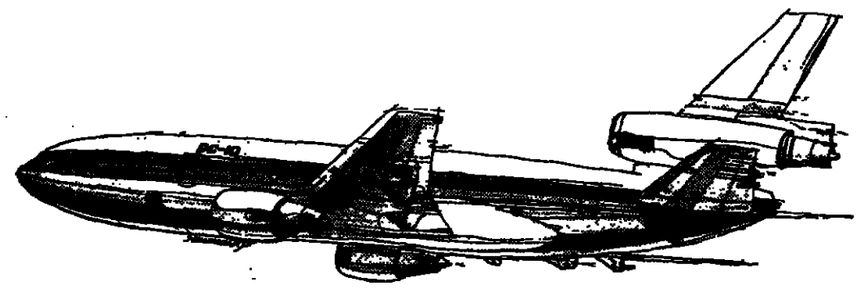


Ideas in flight



Satellites that spring into space from NASA's Shuttle.

When NASA's Space Shuttle flies in the 1980s, the hopes and dreams of a better tomorrow will fly with it. Aboard will be our PAM booster rocket carrying a satellite. In low earth orbit, the craft will emerge from the Shuttle, spin like a top for stability, then rocket into high orbit with its satellite payload. Its goal? Exploring space. Opening new avenues of world-wide communications, weather forecasting and navigation. Even helping to locate the earth's untapped natural resources.



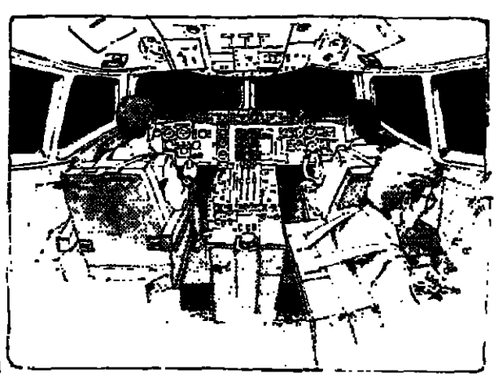
A plane that's been flying for 450 years.

Our DC-10s have been in the air a total of 4,000,000 hours—more than 450 years in all.

Big as those figures are, they're no more impressive than the number of passengers who have flown the DC-10. More than 230 million. And every ten days another million come aboard.

Where do they fly? To more places than any other wide-cabin jetliner could take them—168 cities in 88 countries across six continents. More often, more economically and more comfortably, too.

For your next trip, join the millions of satisfied travelers who fly the DC-10.



Pilots who "fly" anywhere without leaving the ground.

Time was, you had to fly to LaGuardia to learn how to land there. Not any more.

Now there's VITAL IV, a computerized visual simulation system that creates a precise, full-color, moving image of what pilots really see when landing or taking off. Day or night. Under any weather conditions. At hundreds of airports worldwide.

VITAL IV helps train pilots efficiently and economically. And that can help keep the cost of flying affordable for all of us.

To learn more about our ideas in flight, and how they work for you, write for our free booklet, "Surprising But True," McDonnell Douglas, Box 14526, St. Louis, MO 63178 U.S.A.

Carter's Trial of Steadiness

Mr. Carter did the right thing in assembling a panel of old national security hands, led by the politically acute Clark Clifford, to help him decide how to handle the peculiar crisis that has arisen out of Cuba. The president is bound to draw more public support for his policy, whatever it turns out to be, if it is understood that he reached well beyond his own administration to arrive at it. It is a difficult moment for the country; it is the most difficult moment of the Carter presidency. The president needs the surest advice he can get, and he needs to be seen getting it and acting on it.

* * *

It is tempting to offer specific prescriptions for Mr. Carter to follow to get out of this fix, but he will reveal his own soon enough, tonight, and it may be more useful at this point to try to define the kind of fix he is in. It is for Jimmy Carter a crisis of personal leadership, but it is also an authentic national trial — not so much of "toughness," as some would have it, but rather of steadiness. And even those (we are among them) who feel it was produced in good measure by the administration's own ineptitude must care about the outcome. Questioning the president's competence or his policy-making process or his intelligence apparatus may be justified on the merits and will no doubt enliven the presidential campaign, but it serves no useful purpose now and should wait.

Some Americans point to the apparently uncontroverted fact that Soviet troops have been in Cuba unquestioned for years, and they think the president should do as the Kremlin and Fidel Castro demand: back off. But aside from what that would do to the president's political fortunes, it would be an unacceptable national humiliation. It would mean the certain demise of SALT, for one thing. Wisely or not, the president has committed the country's prestige to somehow altering the "status quo," whatever it was and is. Either by obtaining some modification of Soviet behavior or by taking some compensatory step of his own, he must act.

* * *

In acting, however, the president must be careful not to make the encounter larger than what he can effectively handle with the limited political and diplomatic resources he commands. This situation is still elastic; it has not yet been finally defined. If some would define it right off the screen and accept a cosmetic solution, others would make it a draw-the-line Soviet-American showdown and tempt a major confrontation. Both of these courses would be mistaken. There is a mean. Surely a steady, and steadied, president will find it.

What should be the objectives of such a policy? To bring more stability, not less, to the troubled Caribbean. To keep intact the possibility of measured judgments on SALT and on the size and shape of the defense budget. To demonstrate to all sides what most needs to be demonstrated: that the United States is capable of a sensible assessment of its own interests and of a sensible defense of them.

THE WASHINGTON POST.

To Cushion the Dollar's Fall

Hundreds of billions of dollars held abroad make up a sort of supercurrency, a convenient way to pay bills in Bahrain, or store liquid wealth in London. But those billions sloshing around the world's currency markets also represent a threat to the stability of international finance, and a potentially unwelcome source of external pressure on American economic policy.

That is why the Carter adminisration is endorsing a plan to reduce the role of the dollar as a "key" currency by substituting a truly international currency — so-called Special Drawing Rights created by the International Monetary Fund — in its place. There are risks in this scheme. But it would be better to take them now, when currency exchanges are calm and governments are in accord, than during some crisis when the dollar's problems weigh more heavily on world economics and politics.

* * *

The dollar attained exalted status after the Second World War, as it became apparent that the United States would stand behind its value in international exchange. But since the mid-1960s that position has been badly eroded by the relative decline of the American economy. And Presidents from Johnson to Carter have refused to sacrifice other national goals — military activity in Vietnam, full employment at home — to dollar stability.

* * *

Today, virtually no one is happy with the world's dependence on the dollar as the cornerstone of international finance. Foreigners, rightly, do not trust the Carter administration to accept economic stagnation as the price of peace in currency markets. American policy-makers resent the pressure to adopt high interest rates and conservative spending policies to maintain the exchange value of the dollar. All governments fear the potential impact on world trade of a loss of confidence in U.S. currency. And all would probably welcome an arrangement in which some mixture of world currencies became the standard for international transactions, public and private.

The question is how to reach that goal. A formal agreement to demote the dollar would tempt foreign private dollar holders to cash in their accounts for other currencies. That might easily produce sharp gyrations in exchange rates, disrupting world trade and investment — the very condition that responsible parties seek to avoid.

* * *

Here is where the International Monetary Fund's substitution account comes in. If member countries agree, the fund would exchange dollars now owned by foreign governments for its own Special Drawing Rights. Those governments would use the SDR's the way they previously used dollars, as a means of settling international accounts. And the dollars received by the Fund would, in turn, be lent to the U.S. Treasury, where they would effectively be frozen.

The disadvantage of the plan — and what previously caused the Carter administration to oppose it — is psychological. Substitution accounts are, after all, a way of demoting the dollar, albeit an orderly, sophisticated way. If the plan were adopted, individuals and corporations holding dollars might decide to shift to other currencies, putting pressure on the dollar.

* * *

But this appears to be an ideal time to experiment. The dollar is widely regarded as stable for the time; American trade deficits are falling; and the impact of oil price increases should be felt more severely in countries with no oil of their own. Western Europeans, moreover, now seem eager to move toward a truly international supercurrency, lest their own currencies gain the unenvied "key" status that plagues the dollar.

The era of the high-flying dollar is over. The job of the international financial community is to break its fall. More and more, the substitution account idea looks like the appropriate cushion.

THE NEW YORK TIMES.

International Opinion

Turkey's Strapped Government

The political side of the crisis in Turkey is that executive action is paralyzed because neither of the country's biggest parties has the majority to rule alone and they refuse to work together. Any government is therefore reliant on votes from splinter parties, who can thus exert pressure out of proportion to their support in the country.

The economic crisis began with the OPEC oil price rises in 1973 and has been becoming more severe ever since. The policy of building tariff walls to keep out competition is popular with politicans because it helps to keep business in Turkish hands, but many businessmen believe it would have been better to free the economy and do more to promote exports. In the meantime inflation rises astronomically and unemployment increases.

— From the Neue Zuercher Zeitung (Zurich).

In the International Edition

Seventy-Five Years Ago
October 1, 1904

NEW YORK — In several places automatic devices are being used by candidates for public office to provide campaign oratory and save wear and tear on the candidate himself. In Baltimore, Frank Wachter is pushing his campaign for a re-election to Congress by a series of talking machines placed at suitable points in the district. These phonographic spellbinders give forty reasons for voting for Mr. Wachter. "If you want prosperity at home and peace abroad, vote for Wachter," is one of the alluring sentences. Meanwhile, Judge Herrick's nomination for the Governorship of New York is having an excellent effect on the Democratic canvass.

Fifty Years Ago
October 1, 1929

WASHINGTON — Two noted Americans have broadcast advice to professional women which has stirred the nation. Mrs. Mabel Willebrandt, lawyer and former Assistant Attorney General in charge of Prohibition, sent out a clarion radio call for women to ignore sex, ask no favors from men and refrain from mannishness, "a confession of weakness." Henry Ford, automobile industrialist, believes quite differently. "Women cannot vie with men and they are not precise enough for industrial work," declares Mr. Ford. "Women dislike thinking, even in their home life. It is too much trouble."

God Is Alive and Well in Boston

By James Reston

BOSTON — If God is dead, it's news to Boston. This lovely old city is so excited over the arrival of the pope that it has almost forgotten the death of the Red Sox.

How are we to explain the enthusiasm that attends the visit of John Paul II to the United States?

It is not because of a great revival of faith in the doctrines of the Roman Catholic Church — his views on contraception and abortion, the priesthood and Christian religion within the family are rejected by many Roman Catholics. Nor is it simply because he is the spiritual leader of 700 million people in the world — Pope Paul VI never inspired such attention on his journeys from the Vatican, but was heard as a voice of futile good will.

Disenchantment

It is due, I believe, to the disenchantment of so many people with the secular world, and Pope John Paul's unique ability to touch their spiritual loneliness. Even many of those who have benefited most in the struggle for material well-being, somehow seem to feel amputated and separated from the religious heritage of their fathers.

There are, of course, other factors that help explain the extraordinary appeal of this particular pope. In an age that has somehow lost the gift of words, he speaks with simple eloquence in many languages. And he is a symbol of the heroic suffering and spiritual triumph of the Polish people.

Paul Thibald, editor of the French journal Esprit, writing in the Commonweal, makes this point:

"The peoples of Eastern Europe have shown us what culture can be when it is conscious of its nobility, what the courage of a believer can be, and what the demand for human rights signifies. When repression receives its full recognition through a nonpolitical institution like the papacy, it makes one pause and think about the inadequacies of international structures, their inability to speak up for the most elementary moral needs, and their enslavement to the cynical game of national states."

No doubt there is a lot of hatred of the Soviet Union in all these demonstrations. There almost seems to be a longing among many people in this country now for a return to the bad old days of the Cold War, when we could hate one another without all this confusion over foreign words like "detente." This of course is not the same as Pope John Paul's doctrine of love.

Constant Rebirth

It was a happy thought for the pope to start his journey to the United States in Boston. Unlike most of our big cities, Boston does not destroy its memory. Like the human family, it is in a constant process of death and rebirth. Downtown today, it is pushing its new buildings into the sky, but retaining the comfortable huddle of family houses on Beacon Hill under the golden dome of the State Capitol.

There may be a vague connection here between the spiritual and secular worlds. In both, there is conflict and corruption, but also an enduring struggle for something better. The pope is not preaching to a new congregation of believers in America, but to a multitude of doubters who somehow believe in believing.

This is not to suggest that we are on the verge of some religious revival or reformation in the world. Consider Iran where a civil war in the name of religion is almost enough to make religion hateful. Consider Ireland, which is now carrying on an ancient religious war by people who have forgotten the religious principles they are supposed to be defending.

Into this confusion of principles, nations, and principalities, Pope John Paul has emerged, above all the contending races and nations, as a solitary figure — but with the ability to speak with great moral authority.

Accordingly it's no wonder that he has emerged not only as a spiritual but as a political force in the world. For all the other political and economic gods have failed, and he is speaking to the widespread sense of regret in the Western world about the spiritual heritage it has lost.

Two-Way Words: Having It One Way and the Other

By William Safire

NEW YORK — When a cannonball serve tips the net before falling into the opposite court, the net umpire shouts "Let!" or "Let ball!" Most people think he is mispronouncing "net," which is what he says when the serve hits the net without tipping over to the other side.

"Let" is a noun meaning "obstacle," or an archaic verb that lawyers enjoy putting in deeds: "without let or hindrance." When the tennis ball has encountered an obstacle — the net — the umpire calls out the ancient term. (When someone tries to ace you with the etymology of "love" in tennis — from *L'OEUF*, French for "egg," symbolizing "zero" — return it smartly with the etymology of a let ball.)

The purpose of this cannonball lead is to introduce the arcane subject of two-way words. "Let," as a verb, is ambitextrous: meaning both "allow, permit" and its opposite, "hinder, obstruct." Other two-way words make life miserable for the student of English:

A SEEDED rye (caraway to go) has seeds put in; SEEDED raisins have the seeds taken out. A FAST horse runs; a FAST color does not. When you DUST crops, you sprinkle the dust on; when you DUST furniture, you wipe the dust off. When you SCAN a page, you glance at it quickly — or you scrutinize it carefully. (Same thing with PERUSE — it used to mean "to read closely," and now it also means its opposite, "to run your eye over it.")

"If you THINK BETTER OF a person," wrote Joseph Shipley, "you admire him more; if you THINK BETTER OF a project, you cast it aside." Similarly, a HANDICAP helps a long-shot horse compete with the favorite, but a HANDICAP is usually considered a drawback.

Bi the Bi

Sometimes a word is turned into the opposite of itself through sarcastic use: a FINE condition is a far cry from a FINE mess.

Collectors of two-way words (we are a small fraternity) insist on absolute contradiction: FEARFUL meaning "frightened" is not quite the opposite of the fearful that means "frightening." Etymological purity is also required; TO PIT, means both "to put pits in" and its opposite "to remove pits," but the first sense is rooted in making an indentation while the second is derived from the seeds out of a fruit. Nor will TO CLEAVE qualify; the sense that means "to split or separate" has a root quite different from its opposite sense, "to cling or adhere."

All this is by way of answering a provocative postcard that asked, "Do you sanction the use of sanctions?" As to asking readers to send in their favorite two-way words, the more I think of it the less I think of it.

Anent the above (a literary way of saying "about what I was just writing") the most troublesome two-way word is not a word at all, but a perverse prefix: BI.

"Bi" means "two." A bicycle has two wheels. Bilateral talks are between two nations, as against multilateral talks, when everybody chimes in. "Bipartisan" means "two party" and is different from nonpartisan," meaning "no party." "Bicentennial" means every two centuries, "Biennial" means every two years, "bimonthly" means every two months.

Here comes the trouble: some people use "biweekly" to mean "twice a week," and many people use "biannual" to mean "twice a year." They've been doing that ever since the locution began more than a century ago, and the dictionaries dutifully define "biweekly" as meaning both twice a week and every two weeks.

The time has come to end the confusion. "Bi" should mean "two" and not "twice." No more pussyfooting, no more stylebook admonitions to avoid the troublesome prefix by writing "twice a year" and "every two years." I don't want to get prescriptive, but the people who use "bi" for "twice" should cut it out. If you mean "half," and don't want to say "half," use "semi;" if you want a good old word for half a month, try "fortnight," which comes from "fourteen nights."

Language offers many blessings, and the greatest of these is clarity. Get a bumper sticker: "Bye-bye, bi! (meaning 'twice')" Use bi- only to mean "two;" glare at others. Maybe we'll win. This plea will be repeated biannually. (For tickler file: repeat in 1981. Or next March.)

Caring More

Now to a phrase that means the opposite of what it says. Happily, the expression "I could care less" — meaning "I could not care less" — seems to be petering out. The phrase popped up first about 1960, appeared in a letter to columnist Ann Landers in 1966 and in a few years began to cause concern as a barbaric attack on meaning. Acheson Hench, in a 1973 American Speech magazine, claimed it was a slurred form of "couldn't" resulting from the two adjacent dental stops: "dnt." Five years later, linguist James McMillan argued that in familiar sayings, "less than the whole may effectively carry the semantic burden (hence such shortenings as syncope, clipping and nicknaming)."

Usage seems to have peaked in 1973, when the Wall Street Journal headlined: "More and More Girls Flip for Gymnastics; Boys Could Care Less." A healthy derision set in; Herman Wouk called the inversion of meaning "a breezy vulgarism without tang" in the Harper Dictionary of Contemporary Usage, which called it "an ignorant debasement of the language." Maybe the attacks on the anti-meaning helped; eventually, like most vogue phrases, it wore out its welcome.

Farewell, "could care less!" You symbolized the exaltation of slovenliness, the demeaning of meaning, and were used by those who couldn't care less about confusing those who care about the use of words to make sense.

Down the Tubes

Sen. Henry Jackson is not a man given to vivid expression; of him, it was said that "if Scoop Jackson ever gave a fireside chat, the fire would go out." But this hard-line politician used a colorful bit of slang recently when he warned that unless the Russians withdrew troops and planes from Cuba, the SALT treaty would go "down the tubes."

The phrase had been used in politics before. When Richard Nixon was asked in 1968 why he had campaigned for Barry Goldwater in 1964, he replied: "I did not just do it for Goldwater, but to try to save congressmen, senators and governors who were going down the tube with him."

Note the singular "tube" — that's the secret to the origin of the phrase. In surfing, "the tube" is a hollow tunnel that forms in the face of a long wave just before the wave breaks. "To shoot the tube" is to ride near the top of the wave under the curl, or through the hollow, or tubular, part of the curl, as it moves along the wave. (Is that clear? If not, pour a little suntan oil on the page.)

In time, surfers used the verb "to tube" to mean "to do poorly," since shooting the tube required an awkward-looking stance or an amateurish prone position. When surfers went to school and failed a test, instead of saying "I flunked it," they would say "I tubed it," or "I flushed it."

At this point — sometime in the sixties — plumbing metaphors merged with the surfing metaphor. "Down the drain" and the more recent "down the pipe" combined with the surfer slang to become "down the tube." Of late, the plumbing became more complex, and the phrase is "down the tubes," plural, distinguishing those tubes from the singular television, or boob, tube.

Were it not for lexicographers Peter Tamony and Sol Steinmetz, this phrase, as the surfers say, would have wiped me out.

— *Letters* —

U. S. Out of Ireland

It is hypocrisy in the attitude of Irish politicians that dogs relations. The Irish establishment is like the Dickens character Uriah Heep mouthing sanctimonious horror at the murders of the IRA but being careful not to take the steps which they could take, which would effectively reduce their incidence.

As you quote in an article (IHT, Sept. 21), "If the IRA were a foreign terrorist group operating here, it would, of course, have been wiped out long ago." Most English people would probably be pleased to be rid of the Irish problem if Ulster were agreeable to union with the Republic. The haste with which we have disposed of the largest empire in the world shows how anti-imperialist our mart is.

The foolish violence of the IRA delays any chance of Ulster people acquiesing in merger, and also makes it difficult to justify transfer to a nation prepared to exploit such dastardly behavior.

America can best serve the issue by remaining aloof from it.

J.W. SCOULLER
Bracknell, England.

Two-Faced U.S. Stand

The New York Times editorial, "Israel's Foolish Enterprise," (IHT, Sept. 21) raises a serious question. "What a foolish enterprise," the writer exclaims, for Israel "to keep buying inches of the West Bank for the precious coin of U.S. respect."

Perhaps we Americans should ask ourselves if U.S. *respect* is such a precious coin after all. Israel is not the first country to see how fast that coin flips. How quickly we turn our backs on our friends and on the treaties we ourselves have urged them to sign. "Israel," the writer says, "will and should be judged . . . not merely by the legal terms of one or another undertaking but by the spirit. . ." Perhaps Americans should stop preaching the spirit and generosity — terms that can be used and abused at will — and look to the law for a change.

The Palestinians have shown themselves to be lawless murderers who have yet to be tolerated or absorbed by their own Arab brothers. Israel should not have to "tempt" these killers into recognizing its right to exist, nor should she be judged "ungenerous" for not overextending her sympathy and patience toward a nation whose stated goal is her destruction.

If anything should be *judged* at this point, it is America's Janus-faced Mideast policy that calls for the Jews to love their enemies and allows America to scorn its friends.

JUDITH MAIDENBAUM.
Zurich.

A Taxing Cause

Frank Thomas Smith gave us some fine quotations from Thoreau advocating civil disobedience (IHT, Sept. 25). The only trouble is that Thoreau was fighting for a good cause, namely the end of human slavery, and Mr. Smith is fighting for a bad one, nonpayment of income tax. The 16th Amendment, permitting Congress "to lay and collect taxes on incomes" was adopted perfectly legally in 1913. The "civilized" countries have such a tax. An income tax is fairer than a sales tax, since poor people spend their full income, whereas rich ones often invest part of theirs.

Japan Sentimentality Over a Chinese Gift

By Takao Tokuoka

TOKYO — A tendency to look down on fellow Asians is not the only reason Japanese are disliked in Korea and Southeast Asia, where irritation is also expressed over the Japanese preference for animals as opposed to human beings.

The recent avalanche of press coverage of the demise of "the ambassador of friendship between the Japanese and Chinese peoples" offered a superb example of Japanese eagerness to express indebtedness to the 900 million potential customers in China.

That "ambassador," also known as the female giant panda Lan Lan, died of a kidney disorder last month.

Sayonara

The other day, 2,200 people attended a farewell service for Lan Lan at Tokyo's zoo. More than 400 bouquets were offered, and almost 2,000 cables and letters of condolence poured in. The first secretary of the Chinese Embassy read a memorial address, as the specially composed sentimental tune "Sayonara, Lan Lan" played in the background. (An ambitious record company will place the song on the market any day now.)

For a full week, Japanese national dailies devoted such space as would befit the illness of a prominent member of the imperial family to reporting the declining health of Lan Lan. "Let there be a miracle!" blared one headline.

Let Japan show only half as much regret over the equally lamentable killing of whales and international opinion might be more sympathetic to this nation of marine-protein consumers.

Koreans were among the first to criticize the incongruity of the emotional "panda-monium" over Lan Lan's demise.

"Japanese are shedding tears over the loss of an animal," observed Seoul's daily Hankook Ilbo. "What could these tears be but an expression of servility and an inferiority complex toward China?"

Media Blitz

Another Seoul paper, Chosun Ilbo, was equally sarcastic. "Japanese are perhaps the world's greatest animal lovers. So much so they choose to avert their eyes from drowning human refugees in the South China Sea. The Japanese press seems to toy with superficial emotions. Nor does it grasp the essence of events in Korea. The hollow slogan 'peace and security for the Korean Peninsula' has been endlessly parroted by the Japanese and their press."

Since the late Premier Chou En-lai suggested the gift of a pair of pandas seven years ago, Lan Lan and her mate Kan Kan have been a center of attention — if not an obsession — for the Japanese news media.

One Japanese correspondent visited the Peking zoo that year and pondered, "How heart-rending it must be for the Chinese people to give away their pandas!" Felicitously for the sake of his article, however, he was able to quote a woman sweeper of the pandas' abode. She proudly explained to the reporter her pleasure at seeing the beloved pandas become symbols of friendship between the two peoples.

Zealous Japanese began forming queues at the zoo entrance three days before the pandas' first "public appearance" — an enthusiasm matched only by fans of Herbert von Karajan and the Berlin Philharmonic Orchestra.

The affluent metropolitan government of Tokyo quickly set aside 30 million yen ($136,000) for a fully air-conditioned "home" for the pandas, equipped with an indoor playground and swimming pool.

Progeny Watch

Then began the long wait, with several frustrating near-misses, for progeny. Lan Lan received all the care and attention lavished on the overprotected girls of this country. When she and Kan Kan finally mated, national newspapers defied unwritten codes of decency to carry photos of the copulative act.

Considering such VIP treatment, the nationwide mourning over Lan Lan's death was perhaps only to be expected.

The naivete with which the Japanese embrace things Chinese appears strange to Koreans and other Asians. But this is far from the only instance of Japanese behavior to arouse harsh criticism.

The activities of male Japanese tourists in Seoul, Manila, Jakarta, Bangkok, and other cities have long been considered a national disgrace. How strange the psychology of these panda-loving sex adventurers!

Why do the Japanese differentiate so between the Chinese "ambassador of friendship" and other Asians?

It would seem that a nation requires a huge population that can be wishfully thought hungry for cars or televisions, automobiles and hand calculators if it hopes to win the respect of the Japanese.

Takao Tokuoka, a senior staff writer for the Mainichi newspapers, wrote this article for The New York Times.

Meets With Arafat

Jackson Offers to Mediate Between PLO, Washington

BEIRUT, Sept. 30 (NYT) — The Rev. Jesse Jackson offered himself yesterday as a mediator between the U.S. government and the Palestine Liberation Organization.

Rev. Jackson announced the offer to reporters after a two-hour meeting with Yasser Arafat, chairman of the PLO. He was to hold more talks with Mr. Arafat last night before leaving for Cairo today to meet with President Anwar Sadat.

Rev. Jackson said his discussions with Mr. Arafat "could very well establish a beachhead for our government to see whether there is a possibility for it to assume its responsibility, which is in fact to open up talks and reconcile America's several interests in the Middle East."

He did not explain how he intends to get the Carter administration to reverse its established policy of not talking to the PLO until the latter recognizes Israel's right to exist.

Sources close to Rev. Jackson's 17-man delegation said that he hopes to see Mr. Carter in Washington when he returns home to brief the president on his talks with Mr. Arafat and other Mideast leaders.

Rev. Jackson, who arrived here Friday on a three-day visit, had already toured Israel, the Israeli-occupied West Bank and Jordan.

He met Mr. Arafat yesterday at the PLO leader's headquarters at Tariq al-Jedidah in the Moslem quarter of Beirut. Mr. Arafat embraced Rev. Jackson when they met, calling him "my friend, and the friend of justice and humanity."

In the morning, Rev. Jackson and his group visited southern Lebanon and inspected the Mediterranean port of Tyre and the nearby Palestinian refugee camp of Rashidieh.

Only several hundred people are left in the camp while the population of Tyre has been reduced to one third its original size. Constant bombardment by the Israelis and their Lebanese Christian allies have forced most of the civilians to flee north.

At the camp, Rev. Jackson was carried shoulder high by the Palestinians, who chanted "Jackson, Jackson, Abu ammar, Abu ammar," and "Palestine is Arab, Our Revolution Shall Triumph."

Abu ammar is the code name of Mr. Arafat. In Tyre, Rev. Jackson inspected a bombed-out church and talked to Bishop George Haddad, head of the Melchite sect in the city.

United Press International

Rev. Jesse Jackson, left, and PLO leader Yasser Arafat embrace at the start of their meeting in Beirut Saturday.

John Cromwell, 91, Dies; U.S. Director, Actor

SANTA BARBARA, Calif., Sept. 30 (AP) — John Cromwell, 91, best known for directing "Of Human Bondage" and "The Prisoner of Zenda," has died.

Mr. Cromwell died Wednesday of a pulmonary embolism. He began his career as an actor and most recently appeared in the 1978 movie "A Wedding." He first appeared on Broadway at the turn of century, then went to work as a general stage manager and eventually became a director of stage plays.

While on tour in Los Angeles with "The Racket," a play he directed, starred in and produced, Mr. Cromwell was offered a director's contract by Paramount Studios. He went to work there in 1929. He was blacklisted during the McCarthy period in the 1950s and returned to New York to work on the stage as an actor.

Walter Hendricks

BRATTLEBORO, Vt., Sept. 30 (AP) — Walter Hendricks, 87, founder of three Vermont colleges, died here yesterday. He was founder and president of Marlboro College in Marlboro, Windham College in Putney and Mark Hopkins College in Brattleboro. He also headed his own publishing firm, Hendricks House, Inc. of New York, and was vice president and general editor of Hendricks House-Farrar and Straus, also of New York.

Frederick Nossal

BELGRADE, Sept. 30 (AP)— Frederick Nossal, 51, a Canadian information officer for the World Bank, died here after a fall, the bank said today. Mr. Nossal was a former newspaperman and as Peking correspondent for the Toronto Globe and Mail, he was the first journalist to report from the Chinese capital after the establishment of the Communist government.

PLO May Open Harlem Office

NEW YORK, Sept. 30 (AP) — Zehdi Terzi, the PLO's UN observer, says he hopes soon to open a new PLO office in Harlem, one of New York's leading black communities.

"Come live in Harlem," someone yelled Friday evening after Mr. Terzi addressed about 100 members of the Black New York Action Committee at the Mt. Zion Lutheran Church in Harlem. Mr. Terzi, whose mid-Manhattan office is being torn down, revealed that his lawyer was trying to find space in Harlem for a new office.

Turkish Minister Abandons Ecevit, Brings Opposition Close to Majority

ANKARA, Sept. 30 (UPI) — The 21-month-old government of Premier Bulent Ecevit received another blow yesterday with the resignation of a Cabinet member just two weeks before partial elections, and nine days after Deputy Premier Faruk Sukan left the government.

Quitting as minister of reconstruction and settlement, Ahmet Karaaslan said that "with the present government, Turkey's prevailing crisis cannot be overcome." This echoed the words of Mr. Sukan, who said when he resigned: "It is impossible to save the Turkish state from the present crisis under this government."

Mr. Karaaslan's move to the opposition, which was not a surprise, means that a gain by the rightist-led opposition of only two seats in partial elections due next month would give it the 226-seat majority required to topple the government in a vote in the 450-member National Assembly.

The government has tottered on the brink of collapse since early summer, when three ministers quit and went over to the opposition. Shortly before that, five deputies from Mr. Ecevit's Republican People's Party crossed the floor. On Sept. 20, Mr. Sukan quit, and another Republican People's Party deputy has been killed in a road accident.

Mr. Ecevit has weathered the defections because Parliament has been in recess since July. It is not expected to reconvene before Nov. 5, when five new deputies chosen in partial elections scheduled for Oct. 14 will take their seats. Opposition leaders hope to win four of the elections.

Mr. Ecevit held on to power with a slender majority in the elections of late 1977. Since then, while Turkey has suffered a durable economic crisis, violent clashes between extreme rightists and leftists prompted the government to impose martial law on 19 provinces late last year.

In an outbreak typical of the recent unrest, gunmen Friday shot and killed the police chief of Turkey's largest southern city, Adana. Fearing more political violence, authorities forbade the dead man's relatives to hold his funeral in Adana.

Both Nations Sending More Sophisticated Weapons

Russia, U.S. Step Up Arms Flow to Arabian Peninsula

WASHINGTON, Sept. 30 (NYT) — The Soviet Union and the United States are stepping up deliveries of advanced arms to countries on the Arabian Peninsula, Carter administration officials reported last week.

In what was described as a response to Washington's decision earlier this year to provide Yemen with $500 million in military aid, intelligence officials said that the Soviet Union had recently supplied the Marxist government of Southern Yemen with a large quantity of new weapons. The Soviet arms package was said to include a squadron of SU-7 fighter-bombers, T-62 tanks, armored personnel carriers, attack helicopters and two guided-missile patrol boats.

The officials said that in the last few weeks the CIA had also spotted at least eight mobile rocket launchers in Southern Yemen. The launchers are thought to be able to fire a conventionally armed, Soviet-built missile known in the West as the Frog-7, which has a range of 36 miles.

Sales to Saudis

Meanwhile, State Department officials disclosed that the administration had tentatively approved the sale of more than 5,000 missiles to Saudi Arabia. The Saudi government has expressed deep concern over Moscow's military support for Southern Yemen.

The officials said that the missile sale, which must be approved by Congress, was not linked to Moscow's recent deliveries to Southern Yemen but was a response to a long-standing Saudi request for additional weapons for deployment aboard the country's U.S.-built fighter planes. The proposed sale, they said, consisted of 1,000 Sidewinder air-to-air missiles, 900 Maverick television-guided air-to-surface missiles and 3,000 laser-guided bombs.

Officials said the administration was also prepared to honor a Saudi request for 1,000 cluster bombs.

In addition to the missile deal, officials said the administration had also agreed to a $1.5-billion program for building an extensive underground system of shelters for the 60 F-15 fighters that Saudi Arabia was permitted to purchase last year. The fighters, some of the most advanced in the world, will not be delivered to Saudi Arabia until 1982.

The Saudi missile request is said to stem from a decision by the Ford administration in 1975 to sell the country 110 F-5E fighters. Following the sale, Secretary of State Henry Kissinger sought congressional approval for a large number of U.S. missiles for use aboard the fighters, including 2,000 Sidewinder and 1,500 Maverick missiles.

Kissinger's proposal came under fierce attack on Capitol Hill, where critics said the Saudi request was excessive and that the missiles might be used against Israel. In a compromise, Mr. Kissinger agreed to reduce the size of the missile deal and Saudi Arabia was allowed to purchase 850 Sidewinder missiles and 650 Mavericks.

Administration officials are uncertain whether the sale of thousands of new missiles will provoke a similar controvery, and the State Department has already begun to take informal soundings of congressional views toward the proposed sale.

Developing Nations Seek Reforms of Financial Aid

By David A. Andelman

BELGRADE, Sept. 30 (NYT) — The world's developing countries yesterday issued a series of demands for changes in the system of financial assistance from the industrialized world. The Group of 77, which now represents more than 120 developing countries, met in advance of this week's annual meeting of the International Monetary Fund and the World Bank, to be held here.

The group unanimously endorsed a program adopted Friday by a smaller body known as the Group of 24. The program demands reforms including a medium-term credit facility from the International Monetary Fund, changes in the quota and voting systems of the IMF and the World Bank, and substantially larger contributions to the capital of international lending institutions.

Officials of the Group of 77 said that if the industrialized countries consider their program, the group will support a concept known as the substitution account — a device designed to mop up excess dollar liquidity and diversify international reserves from the dollar to other currencies. The IMF is expected to ratify the idea next week after the industrialized countries make some gestures toward the program of the Group of 77.

Gloomy Prospects

The group unanimously approved a Pakistani proposal that the Palestine Liberation Organization be given observer status in the IMF and the World Bank.

The focus of several other preliminary forums yesterday was the generally gloomy economic prospects for both industrialized and developing nations.

Deputy ministers representing members of the International Development Association, the soft-loan affiliate of the World Bank, discussed the sixth replenishment of that facility, which is expected to come to between $12 billion and $13 billion. The leading industrial countries were meeting privately today.

March by Flemings Broken Up by Police

COMINES, Belgium, Sept 30 (AP) — Police used tear gas and rubber bullets Saturday to disperse about 1,500 Flemish demonstrators who were seeking to press the government to build a Flemish school.

Officials said three policemen were injured when the demonstrators threw stones and broke windows in seven police cars. Comines is a francophone town about 50 miles west of Brussels near the French border.

Khaled Travels to Libya

GENEVA, Sept. 30 (AP) — King Khaled of Saudi Arabia left here yesterday to fly to Libya for a two-day visit. He may meet with Col. Moamer Qadhafi, the Libyan leader.

Shell Oil Makes $3 Billion Offer For Firm in U.S.

WASHINGTON, Sept. 30 (WP) — Shell Oil Co. has contracted to purchase Belridge Oil Co. of California for as much as $3.65 billion. Government sources call it the biggest cash takeover in U.S. history.

Belridge properties in Kern County, Calif., 40 miles west of Bakersfield, include at least 376 million barrels of proved reserves of heavy oil, with present production of about 40,000 barrels a day. These reserves, plus a farm producing cotton, citrus, almonds and other crops are included in the deal. The land totals more than 20,000 acres.

Because of the large amount of money and oil involved, the deal is certain to undergo careful examination by the Federal Trade Commission or the Justice Department to determine if it would lessen competition, an FTC spokesman said.

Shell has offered Belridge three different plans of takeover or merger, under which Shell would acquire from 59 percent to 100 percent of its 996,800 shares of stock. If Belridge agrees to 100 percent, the price will be $3.65 billion.

Belridge was founded in 1911 by the Greene, Whittier and Buck families, whose descendants still hold majority control. Although two big oil firms, Mobil and Texaco, together own 35 percent, California law permits the majority shareholders to force sale of all shares under certain conditions.

2 Bombs Defused In Ankara Airport

ANKARA, Sept. 30 (AP) — Two bombs designed to explode in Ankara's Esenboga Airport were defused yesterday just before they were set to go off, after the bombers prematurely boasted of their action, officials disclosed today.

The Secret Armenian Army informed the AP's Beirut bureau last night that they were responsible for two explosions in Esenboga's transit lounge which they claimed had caused considerable damage. Editors of the Istanbul daily Hurriyet, an AP subscriber, saw the Beirut story and alerted authorities in the Turkish capital.

Laotian Leaves Moscow

MOSCOW, Sept. 30 (UPI) — Laotian Premier Kaysone Phomvihan left Moscow for home yesterday after an official visit, Tass said.

Renault F1 V6 Turbo:
the only turbo-powered Formula 1
in the world.

Formula I racing is the ultimate test of automotive engineering.
So advanced are the requirements of today's Formula I racing that most leading car manufacturers call on independent engineers – half alchemist, half genius – to transform their basic factory product into "racing gold".
Renault is the only major car manufacturer to develop its own successful Formula I car, the V6 Turbo, the only turbo-charged Formula I car in Grand Prix racing.
Its V6 1500 cc engine, a technological triumph, develops 500 bhp/din and took it to first and third place in the French Grand Prix.
Making top quality cars to today's increasing strict international standards demands the same degree of engineering skill. Renault has proved once again with its Formula I V6 Turbo how outstanding is its engineering – and how complete is its skill as a car manufacturer.
Renault – fine engineering for perfect motoring.

1er Grand Prix de France 1979
RENAULT
Renault-elf: a lap ahead of the future.

Pressure on Dollar Puts Off Investors

By William Ellington

LONDON, Sept. 30 (AP-DJ) — vestors showed a distinct lack of thusiasm for the international nd market last week.

ntense selling pressure on the llar, soaring commodity prices l by gold and higher U.S. interest es acted to immobilize investors. uring the week, prices of dollar-nominated Eurobonds posted attered gains while issues in utsche marks moved slightly low-

However, with the Tokyo stock arket reaching a record high dur- the week and the Swiss franc oving up in the foreign exchange arket, convertible bonds of Japa-se and Swiss companies were in ong demand.

A sampling of opinion among veral European bankers indicates at weakness of the dollar is the ramount problem for the market, though high short-term interest tes and a high rate of inflation me a close second.

"I don't think we can find a yield sis for the [dollar] bond market at will attract funds until uncer-inty about the dollar itself is re-oved," one London banker said.

More Severe Crisis

According to some analysts, the esent currency crisis may be more vere than the one that led up to st November's U.S. currency sup-ort package because the amount of ollars held in unwilling hands is eater.

For one thing, this year's 60-per-ent oil-price increase has boosted he financial surplus of the oil states an estimated $4 to $5 billion a onth. For what one banker de-cribes as "prudential reasons," a ot of these dollars are being sold or other currencies and gold. qually disturbing is the tendency f central banks outside the indus-trial states to step up their sales of dollars to avoid losses, bankers say.

Some bankers argue that if another support package for the dollar is worked out, it would have to be more extensive than last November's measures, which mainly involved an increase in the amount of credit made available to the New York Federal Reserve Bank for support of the dollar. Among possible new measures, bankers mentioned a further tightening of U.S. credit and reintroduction of capital controls similar to those that existed prior to 1974.

In the convertible sector last week, a $50-million, 15-year issue of Daiei Inc., Japan's largest retailer, was greatly oversubscribed although the terms were readjusted during the selling period in favor of the borrower. After the semiannual coupon rate was lowered a half point to 6.5 percent, the issue was quoted Friday at 101.25-102.25, up from issue price of par.

Premium

The issue is convertible starting Nov. 1 at 1,020 yen. This represented a premium above Friday's closing price of 9.56 percent. Investors have the right to redeem the issue on Aug. 31, 1984, at 118, which provides an annual discounted yield of 9.59 percent.

Three recent Japanese convertible issues, including the Daiei offering, have provided optional redemption, or "put," features designed to overcome investor reluctance to buy low-coupon issues when interest rates are high.

However, the success of these issues has been so overwhelming that a syndicate led by Smith Barney-Harris Upham and Co. decided that such an inducement was not necessary for a $50-million, 15-year convertible issue of Toshiba Corp., the Japanese electrical equipment producer. However, Toshiba's proposed semiannual coupon rate is 7.5 percent.

This is a point higher than two other recent Japanese convertibles with "puts." Even so, syndicate sources said the Toshiba issue was selling well. Ross and Partner (Securities) Ltd., which specializes in making a market in offerings during the selling period, was quoting the bonds at a discount from issue price of 1 point bid, 0.25 points offered.

Also on offer is a $30-million, 15-year issue of Alco Standard Finance International NV, which is convertible into shares of Alco Standard Corp., a widely diversified company. The syndicate manager, Kidder Peabody International, has indicated that the annual coupon will range between 9 and 9.5 percent and the conversion premium above the share price will be between 20 and 25 percent.

Salesmen argued that the issue will appeal to investors who have losses on their present dollar bond holdings and who want to find a way of recouping the loss. They said the relatively high coupon rate will enable investors to switch from straight issues without much loss of current yield. The appreciation po-

New York Stock Market

By Vartanig G. Vartan

NEW YORK, Sept. 30 (NYT) — A barrage of negative developments finally caught up with the stock market last week to send prices lower. It was a week that most optimists on Wall Street would like to forget.

What made some analysts particularly nervous was the steep rise in the price of gold bullion — one sign of international distrust in the dollar — to nearly $400 an ounce. At the start of 1979, gold fetched $226 an ounce.

The Dow Jones industrial average retreated 15.36 points to 878.58. Only a week earlier, it had finished at the highest level in nearly a year.

On Friday, Citibank raised its prime rate to 13½ percent, thereby setting yet another record level for the basic lending charge to top-rated corporate borrowers. Other major banks soon followed suit.

The same day, Albert Cox Jr., the chief economist at Merrill Lynch, Pierce Fenner & Smith, cited his growing concern about rising inflation rates and rising inventories, as well as climbing interest rates.

Pessimism Is Rising

In addition, Mr. Cox said his pessimism over economic prospects also was rising. He foresaw a 50-50 chance that the economy will suffer through a rather severe phase that might not start to ease until the autumn of 1980.

Silver stocks and other mining issues, along with selected oils, ranked as some of the week's best market performers. The rationale, it seemed, was to buy stocks of companies that owned something in the ground as a possible hedge against inflation.

Meanwhile, aside from recent market winners, a number of smaller, scarcely-noticed companies operating above the ground have turned in good records over the years in the stock market. Cafeteria companies offer a typical example. A select list of publicly-owned cafeteria stocks continues to flourish. The food in these cafeterias is served over-the-counter and so are the stocks.

Consider, for example, Cafeterias Inc., a company whose units are located primarily in suburban shopping centers in Texas. Adjusted for stock splits, this issue rose from a low of 2⅜ bid five years ago to a record price of 28½ bid in 1978. Lately, it has been trading in the low and mid-20s.

Metals Futures Ease Off After New Highs

By Sue Shellenbarger

CHICAGO, Sept. 30 (AP-DJ) — The steep climb in metals futures slowed in erratic trading Friday as traders speculated that new steps may be taken to defend the dollar.

"It was a wild and woolly affair today [Friday]," said an analyst, describing an early rally that carried silver, gold, sugar and some copper futures to new season's highs and then collapsed in profit-taking.

Gold futures on New York's Commodity Exchange Inc. rose early, partly on carryover buying after Thursday's late report of a larger-than-expected trade deficit. But prices met resistance at Thursday's record highs of $409 an ounce in the pacesetting December contract — roughly equivalent to $400 on the spot market — and closed mixed.

Copper futures plunged by up to six cents a pound after five straight days of limited advances. Silver futures soared by their daily trading limit but fell from the day's highs with gold.

Dollar Losses

"They're just buying anything now," said an analyst of this week's rally in metals, sugar, cotton, grains and orange juice. "There is widespread feeling now that something had best be done about the dollar. Even central bank intervention has not been enough to stem its huge losses," he said.

Meanwhile, Thursday's rumors that oil-producing nations would abandon the dollar as an oil-pricing unit faded.

On the New York coffee and sugar exchange, sugar futures continued a powerful rally that began Thursday to set new life-of-contract highs, but followed copper and other metals lower. By the close, bids were .04 to .29 cents a pound lower, with the nearby October contract falling farthest on liquidation before its expiration.

On the Chicago Board of Trade, grain and soybean futures also retraced part of their advances of Thursday. An increase in country cash sales of corn and soybeans, and expectations of more selling by farmers over the weekend, led to hedge-type selling of futures by commercial cash grain buyers seeking to lock in current prices.

Sharp Increases

Corn futures fell 1½ to 3 cents a bushel, wheat dropped ¼ to 5¼ cents and soybeans lost 6 to 15½ cents. An analyst noted that sharp price increases, in an absence of other news, are questionable when farmers are beginning a record corn and soybean harvest.

On the New York Cotton Exchange, cotton futures fell .4 to 1.3 cents a pound, also following the selling trend in metals. Prices for October delivery still closed .52 cents a pound higher for the week, however, after a sharp decline in warehouse stocks of cotton certificated by the exchange.

An analyst said the lateness of this year's cotton harvest has forced mills and merchants to withdraw cotton from those warehouses to meet their commitments.

On the Chicago Mercantile Exchange, live cattle futures rallied .97 to 1.5 cents a pound, primarily on buying by an influential commission house. Cash beef prices offered no incentive for buying of futures, an analyst said, which rose 1.25 cents a pound for October delivery last week.

Live hog futures were mostly higher despite heavy slaughterings, gaining as much as .75 cent a pound in sympathy with cattle futures. Pork belly (bacon) futures gained 1.2 to 1.7 cents a pound.

On the New York Cocoa Exchange, cocoa futures fell .99 to 1.75 cents a pound as brokerage house customers took their profits, in line with lower cocoa prices in London.

8 Major Corporations Involved

Ottawa to Sell Government-Owned Firms

TORONTO, Sept. 30 (NYT) — Canada's new Conservative government has announced that it is putting on sale eight major government-owned corporations valued at more than $804 million.

The move is part of an effort to revitalize industry and carve a "leaner and less expensive government," according to the announcement on Friday.

The companies, which include DeHavilland Aircraft of Canada, Canadair Ltd. and Eldorado Nuclear Ltd., have 12,468 employees, and combined sales in 1978 were in excess of $357 million. They are seen as the "guinea pig" sale corporations for what the administration of Prime Minister Joe Clark has vowed will be a wholesale cleaning out of government ownership, possibly involving one-third of the 401 government-controlled enterprises or crown corporations.

Companies Involved

The move, which is similar to ones made recently by the new Conservative government in Britain, involves the following companies:

- DeHavilland. Purchased from Hawker-Siddeley of Britain in 1974 for $38 million, the Toronto aircraft company has 4,500 employees and produces the Twin Otter, Caribou and the Dash-short-takeoff-and-landing craft. It had 1978 earnings of $1.9 million in Canadian currency on sales of $124.2 million. The Canadian dollar is worth about 85 U.S. cents.
- Canadair. Long involved in military aircraft production, this former Subsidiary of the General Dynamics Corp. was bought by the former Liberal government in 1976 for $46.6 million. The Montreal company now produces the Challenger executive jet, surveillance drones, water bombers for forest fires and parts for Boeing 747s. Its 5,600 employees produced 1978 earnings of $3.2 million on $82 million sales. Also for sale is its U.S. sales and service subsidiary, Canadair Inc.
- Eldorado Nuclear Ltd. This Ottawa company operates a uranium mine near Uranium City, Saskatchewan, and Canada's only uranium refinery at Port Hope, Ontario. Begun in 1926 as Eldorado Gold Mines, the company was nationalized during World War II. With 700 employees it had 1978 earnings of $17.6 million on sales of $124 million. Also for sale are Eldorado Aviation, the company's air transport arm, and Eldor Resources, a subsidiary developing uranium resources in northern Saskatchewan.
- Northern Transportation Ltd. of Edmonton. It is a barge transportation system serving communities and oil and gas exploration camps along the Mackenzie River in the Northwest Territories and on Hudson Bay. Acquired as part of the Eldorado nationalization, Northern is the only money loser among the eight companies on sale. It has 700 employees and a 1978 loss of $340,000 on sales of $26.5 million. Also for sale is its trucking subsidiary, Grimshaw Trucking and Distributing.

Exact form of the sales is to be determined by a special interdepartmental group. It is most likely to involve share sales to the public, but some operations could be sold to other companies. One condition: control of each company must remain in Canada.

Over-Counter Market

NEW YORK (AP)-Weekly Over the Counter stocks giving the high, low, and last bid prices for the week with the net change from the previous week's last bid prices. All quotations supplied by the National Association of Securities Dealers, Inc., are not actual transactions but are representative interdealer prices at which these securities could have been sold. Bayerische Vereinsbank International Société Anonyme

Vereins- und Westbank Aktiengesellschaft

Wirtschafts- und Privatbank

We work hard for your business...

...in financing international trade too.

Hard work is second nature to Badische Kommunale Landesbank, one of Southwest Germany's leading banks.

BAKOLA has succeeded in establishing its international reputation not on size and location, but on a combination of innovative banking skills, exceptional flexibility, and a determination to earn and retain client confidence through reliable, individual service.

With total assets of DM 17.4 billion and the authority to issue its own bearer bonds, BAKOLA is big enough to satisfy most international financial needs, yet compact enough to act quickly and flexibly to keep pace with rapidly changing client requirements.

For example, in financing international trade. From our headquarters in Mannheim, we offer short to long-term fixed-rate DM loans and buyers' and sellers' credits as well as payments and collections, letters of credit, discounting of foreign bills, foreign exchange hedging, and other facilities.

Our wholly-owned subsidiary in Luxembourg – Badische Kommunale Landesbank International S.A. – specializes in managing and participating in syndicated Euroloans, as well as money market and foreign exchange dealing, and Eurobond trading.

Forfaitierung und Finanz AG (FFZ) in Zurich concentrates on non-recourse export financing (à forfait), short and medium-term trade financing, and other specialized services.

BAKOLA has been working hard for German and international companies for more than 60 years. For a banking partner that understands the nuances of international financing and stakes its reputation on dependable service, just contact:

ARAB LATIN AMERICAN BANK

ARLABANK: a bridge between the Arab world and Latin America

Two important world regions have been joined by a new concept in banking – a bridge built for finance, investment, and trade between Arab and Latin American countries: Arlabank.

Unique advantages of Arlabank are the strong backing from its twenty-seven distinguished shareholders from 18 countries and that many of these are important government and private financial institutions in the Arab world and in Latin America.

Upon this solid foundation Arlabank has forged a place for itself among the major banks in the international money, loan syndication, and capital markets.

For good reasons most of the leading international banks have already established relations with Arlabank. International support of such standing should be an influential factor in your decision to work with Arlabank.

SOCIETE CIVILE DES PORTEURS D'OBLIGATIONS 8.50% 1976-1986 de $1,000 NOMINAL DE LA CAISSE NATIONALE DES AUTOROUTES
Head office: 56, rue de Lille, 75356 Paris

CAISSE NATIONALE DES AUTOROUTES
Registered office: 56, rue de Lille 75356 PARIS

NOTICE OF MEETING

Notice is hereby given to the holders of $1,000 nominal 8.50% 1976-1986 notes of the Caisse nationale des autoroutes that a general meeting will be held on Friday, November 2, 1979, at 10 a.m., Paris time, at the Société Civile's head office, 56 rue de Lille, 75356 Paris, to vote the following agenda:
— Ratification of the "Statuts" of the Société Civile,
— Ratification of the appointment of the Directors, pursuant to Art. 7 of the "Statuts" of the Société Civile,
— Nomination and election of new Directors.

Any Noteholder may attend the Meeting or be represented in it. The Noteholders will have to deposit their Notes 5 days before the date of the Meeting with the following banks and institutions:
— Citibank N.A. (Belgium)-(Brussels)
— Citibank N.A. (London)
— Citibank N.A. (New-York)
— Crédit Industriel d'Alsace et de Lorraine (Luxembourg)
— Crédit Industriel et Commercial (Paris)
— Deutsche Bank AG (Frankfurt)
— Swiss Bank Corporation (Zurich)

where they will get receipts certifying the deposit of the Notes and where the proxies will be available to them.

The Board of Directors.

Currency Rates

By reading across this table of the September 28, 1979's closing inter-bank foreign exchange rates, one can find the value of the major currencies in the national currencies of each of the following financial centers. These rates do not take into account bank service charges.

The MANAGEMENT OF FOREIGN EXCHANGE RISKS

PARIS, OCTOBER 29 & 30, 1979

An International Herald Tribune/Forex Research Conference

IMF Managing Director Jacques de Larosiere and Ahmed Abdullatif, Director General of the Foreign Department of the Saudi Arabian Monetary Agency, will be featured speakers at the fourth conference on "The Management of Foreign Exchange Risks" to be organized by the International Herald Tribune and Forex Research.

Also representing the public sector at this two-day working seminar will be Christopher McMahon, Executive Director of the Bank of England, speaking on "Sterling and the EMS." Jacques van Ypersele, Chairman of the EEC Monetary Committee, and Philippe Jurgensen of the French Finance Ministry will further explore the future of the EMS.

Speakers from the private sector will include Treasurers of Peugeot-Citroen, Sandoz and Continental Oil as well as senior officers from Morgan Guaranty Trust, International Harvester and other multinationals.

Specific techniques for managing currency exposure will be discussed in detail: hedging, currency reinvoicing, technical analysis and the use of forecasts. Case studies will cover taxation problems, the medium-sized firm and the advantages of using forward markets versus local currency borrowing.

A point of special interset will be exchange rate and interest rate forecasts for the coming year.

Make sure your company is represented at this important international conference. Complete and return the registration form below today.

CONFERENCE REGISTRATION

Please enroll the following participant for the IHT/Forex Conference, October 29 and 30.

Surname
First name
Position
Company
Address
City Country

Fees are payable in advance of the conference. Each participant: F.Fr.2,600 or the equivalent (plus 17.6% TVA for inscriptions coming from France). This includes all refreshments, lunches, and post-conference documentation. Fees will be returned in full for any cancellation that is postmarked on or before October 15.

☐ Please invoice ☐ Check enclosed

RETURN TO:
The International Herald Tribune Foreign Exchange Conference, 181 Avenue Charles-de-Gaulle, 92200 Neuilly-sur-Seine, France. Tel: 747.12.65. ext. 260.

HOTEL ACCOMMODATIONS

Please reserve for the nights of October 28 and 29 the accommodations checked below:

☐ Single room (F.Fr. 320 per night)
☐ Double room (F.Fr. 380 per night)

Reservations must be received no later than October 8, and accompanied by a check for the first night.

ollar, U.S. Interest Rates epress Eurobond Market

(Continued from Page 9)

al of the convertible bonds was to be good because Alco Stan- has a low amount of debt and cord of high growth rate.

lthough the initial reaction to a million, 15-year convertible is- of Charter International nce NV bearing 8.25 percent favorable, ardor among some don portfolio managers cooled r a presentation by the oil com- y's executives in London last k. According to two of the partici- nts, the presentation left a lot of bts. For one thing, Charter dis- ed that its Bahamian refinery, ch is the main source of its in- e, is dependent upon Libya and for 80 percent of its supplies of

here is a big political risk there the stock has already gone from 50 this year; that makes it too ulative," a participant said.

he Swedish government is using rmula that should allow it to ob- fixed-rate funds without paying ent high coupon rates.

Dubbed "drop-lock" bonds, the 0-million offering comprises 12- r bonds that start out with a ting interest rate. Interest is able quarterly at 0.25 points ve the bid and offered rate for e-month interbank eurodollar osits.

his is a narrower spread above rbank rates than Sweden could ain with a medium-term bank , bankers say. However, if the ks participating as underwriters ide to invest in the issue, they uld be able to collect commis- ns of 2 percent. This would raise yield of the bonds to a level that uld be nearly comparable with a n, bankers say.

he main disadvantage to the estor is that the issue will be- ne fixed rate at 9 percent semian- ally if U.S. Treasury note yields line to 8.25 percent. Specifically, formula says that if the average ekly rate for 10-year U.S. Treas- notes, as published by the Fed- l Reserve, is at 8.25 percent or er in the week prior to the upon date on two successive oc- ions, the bonds become fixed e at 9 percent.

The investor has no choice over matter and could wind up with ercent bonds when other Swed- paper is yielding more, say 9.5 rcent. In such circumstances, the tomatic conversion would be im- diately translated into a loss for the investor. This is because the price of the 9-percent bonds would have to fall to bring the yield up to the higher yields prevailing in the market.

Secondary Market

Two other tightly priced floating rate note issues last week performed badly when secondary market trading started. A $100-million, seven-year issue of the Philippines, which bears semiannual interest at a quarter point over the interbank offered rate, fell to 96.5-97 from issue price of par. A $100-million, 12-year issue of Fiat Finance Corp. was quoted at 97.13-97.63, down from par. The Fiat issue pays interest twice a year at 0.125 points above the six-month interbank offered rate for the first five years and 0.25 points above for the remaining seven years.

Currently on offer is a $30-million, 12-year float of Hill Samuel Group Ltd. Managed by Morgan Stanley International, the issue pays semiannual interest at a quarter over the interbank rate. This week, a syndicate led by Credit Commercial de France is expected to launch a $100-million, seven-year floater for the Caisse Nationale des Telecommunications, the French state telephone utility. Interest is expected to be at a quarter point above the bid and offer rate for eurodollar deposits and underwriting fees will be reduced.

The European Economic Community has a $500-million, 7.5-percent coupon issue coming due in December. Syndicate sources say this issue will probably be refunded with a deutsche mark offering totaling a minimum of 600 million marks.

The prospect of this issue, along with a heavy flow of public issues and private placements, has acted as a drag on the market. Furthermore, the currency play in the deutsche mark (apart from dollar investors) appears to have diminished after the deutsche mark's 2-percent revaluation within the Snake on Sept. 23.

As a consequence, deutsche mark issues were mostly depressed.

Mick Kelleher of the Chicago Cubs awaits the throw at second base as Omar Moreno of the Pittsburgh Pirates, the National League leader in stolen bases, dives in safe.

On the Trail of Battling Bonito

By Red Smith

MARTHA'S VINEYARD, Mass. (NYT) — Morning came in on the tailgate of night, arriving too soon. In the gray chill over the Coast Guard station in Menemsha a red flag flew as a small craft warning. We might be in for some weather, Doug Fischer said, but it wouldn't take long to get out of it. The idea was to anchor just outside the mouth of Menemsha Creek where the tide runs swiftly between Vineyard Sound and Menemsha Pond and bonito follow the tide in pursuit of baitfish.

Get fast to a healthy bonito, Doug said, and you'd think you had a bonefish on, the way those critters could run. "We took 21 bonito yesterday," he said, "and we don't have to burn a lot of gas."

Doug grew up on this right little, tight little isle, and when he comes back in the summer he keeps busy as a fishing guide. The rest of the year he is a fishing guide in Florida. He had his boat, Kingfisher, tied at Dutcher Dock when Dexter Goodwin arrived with another guy, and while he puttered about the cockpit his eyes searched the water alongside. Spotting the silvery glint of a school of small herring, he cast a weighted throw-net over the side, waited a moment, then hauled in a wriggling mass of bait.

On the Beach

Doug's father, Ozzie, arrived, and with his crew of three Doug cast off. It was still too early for breakfast in civilized households but Ozzie had been up surf-casting for hours. He had taken one blue, no stripers.

The sun had not yet put in an appearance but the cloud cover was beginning to burn off, letting some pale blue show through. About 15 fisherfolk were casting from the stone jetty at the harbor entrance, two of them using flyrods. Doug ran slowly past them, keeping to the far side of the channel, turned west in Menemsha Bight, swung downwind and anchored by the stern. He was about 200 feet off the jetty, in casting range of the tidal stream.

Doug baited three rods with live herring, hooking the minnows through the dorsal skin just ahead of the fin. Cast into the edge of the current with no weight to sink them, they swam freely a trifle below the surface. "When he takes it," Doug said, "let him run enough to tighten the line before you strike."

He consulted signs and portents. "Tide's still running in," he said. "I've been getting best results on an outgoing tide."

The words were hardly out when Dex Goodwin was into a fish. His reel sounded like a tiny soprano fire siren and it kept on screaming. "You'll know when you're out of line," Doug said. A sound behind him made him turn. It was half a grunt, half a snort, such as a rutting wart hog might make in a romantic passage. Ozzie was fast to a fish.

Every Which Way

The bonito ran straight out, they ran straight in, they ran left, they ran right, they ran around the boat, under the boat and around the anchor line. Ozzie and Dexter moved to soundless disco music, genuflecting to pass one line below the other, pirouetting daintily as the boat heaved and rolled. Doug gaffed two fish that came aboard grinning wickedly.

"Better check your bait," Doug told the other guy.

The hook was bare.

"You've been fishing on credit," Doug said.

The other guy got a fish on. For a long moment it just sulked, going nowhere. "He doesn't know he's hooked," Doug said. The bonito found out. It took off for Chatham, Mass. Bonefish don't run faster or farther. When the first run ended, the bonito fought on and on, stronger by far than bonefish.

"Yankee bonefish!" Doug said, sinking the gaff.

Two boats nearby were taking fish, but a convocation of gulls and terns concentrated on Kingfisher. Every time Doug cast a fresh herring, birds dived for it. They didn't always get it, but the Yankees' outfield should have a fielding average as good. Doug cursed them feather by feather, without visible effect.

At length he devised a strategem: his father would fling a herring in one direction and as the birds swooped in pursuit, Doug cast behind them, giving the bait time to sink a few inches.

One That Got Away

It didn't always work. One gull got Ozzie's bait and Ozzie's hook. Tethered by the beak, it took flight, was brought up short, did three barrel rolls and an inside loop and went cartwheeling down to the water. Taking the line in his hands, Doug drew the bird in, cradled it gently against his chest and removed the hook from the tip of its bill. He tossed it aloft, and the bird flew with strong, sure strokes.

In spite of the birds, in spite of the other guy's ability to lose bait, fish kept attacking, fighting and surrendering with sullen reluctance. Ozzie, the club pro, outfished Dexter 2 to 1 and Dexter outfished the other guy 2 to 1. Ozzie got the day's biggest fish, but it was the unappetizing variety called little tunny, or false albacore. Ozzie got a blue. Ozzie hooked the line of a joker on the jetty who kept casting a big lead jig alongside Kingfisher.

On the horizon, black clouds obliterated Cuttyhunk and the rest of the Elizabeth Islands. A howling storm threatened, but the threat passed with only a brief spatter of rain. The sun came out, the wind hauled around to the northwest, temperatures dropped, the sea turned royal blue topped with whipped cream.

About 11 a.m. Kingfisher's crew coasted back to the dock, deeply content. Ozzie had caught about 10 bonito, one bluefish, one tunny, one fisherman and one bird. The championship was his, undisputed.

Watson Leads World Series Of Golf by One

AKRON, Ohio, Sept. 30 (UPI) — Tom Watson, trying to become the first professional golfer to win $500,000 in a single season, shot a five-under-par 65 here yesterday to take the lead at the halfway point of the World Series of Golf.

Watson's 68-65 — 133 gave him a one-stroke lead over Lon Hinkle's 67-67 — 134 after two rounds at the Firestone Country Club south course.

Tied for third were Tom Kite at 67-68 — 135, Lee Trevino at 67-68 — 135 and Larry Nelson at 68-67 — 135. Tied for sixth were Bill Rogers with a 69-67 — 136, J.C. Snead at 66-70 — 136 and Howard Twitty with a 69-67 — 136.

Andy Bean, who held a two-stroke lead with a six-under par 64 in the first round, faltered yesterday and shot a five-over 75, which left him far back in the pack with a 139 total.

Since the second round had to be postponed from Friday to yesterday because of rain, both the third and fourth rounds were to be played today — meaning 36 holes of golf for all 38 entrants.

Art Buchwald

Thou Shalt Not Covet A Banker's Blanket

WASHINGTON — Remember those wonderful advertisements of a few years ago telling you *that if you brought a friend into a* bank and he opened an account, you would receive anything from a toaster to a 25-inch color television set for steering him their way?

Well, it was a great gimmick and heaven knows how many people were dragged into banks by their friends. While the depositor was over at the teller's window filling out all the forms, the bounty hunter was escorted to the bank's hidden gift shop where he could select a token of the bank's esteem.

Buchwald

I even did it myself. A few years ago I talked my friend Brinkerhoff into putting all his savings into the Second National Trust and Dime Savings Bank of Georgetown and wound up with an electric blanket as my reward.

* * *

The other day a vice president of the bank came to see me. He was very angry. "Brinkerhoff has just taken all his funds out of the bank," he told me.

"I'm sorry to hear that," I said. "I guess he figured he could do better somewhere else."

"It's your responsibility to get him back," he said.

"I don't see how you figure that," I said. "All your advertisement asked me to do was bring a friend in. You said nothing about my guaranteeing he would stay with you."

"It should have been obvious when you accepted an electric blanket from us that we expected you to make sure that Brinkerhoff would stay with us. Do you think blankets grow on trees?"

I told him, "Well, if you want to know the truth, Brinkerhoff and I aren't talking any more."

"*What happened?*"

"My wife let it slip about three months later that I got an electric blanket for steering Brinkerhoff into your bank. Since he got nothing for depositing his money there he accused me of being a shill for *you and he stomped out of my* house in a rage. I haven't heard from him since."

"You handled it very badly. We told you at the time not to mention your gift to *anyone*."

* * *

"There was nothing in your advertisement that said I had to keep my lips sealed."

"Well," he said, "now you see the results of your wife's indiscretion. You lost a friend and we lost an *account*."

"You bankers must be used to taking risks. What's the big deal?"

"Banks don't take risks. That's why we're banks. I must ask you to return the electric blanket."

"You're crazy. I'm not going to give back a blanket that was given to me for bringing in a friend. Besides, the dog chewed a big hole in it and the wiring doesn't work any more."

"We can have it repaired. Frankly, we're not interested in the blanket. But we cannot allow people to accept gifts from us for bringing in new customers who keep pulling out their money. We're not Goodwill Industries."

"I'm aware of that," I said, "but my dog loves that blanket and he'll tear my arm off if I give it to you."

"You should have thought of that before you brought Brinkerhoff into the bank."

"Maybe if you had given him an electric blanket as well, Brinkerhoff wouldn't have taken his money out."

* * *

"The ad specifically said only friends of prospective clients would receive gifts. Had Brinkerhoff come in without a friend he might have been entitled to choose an appliance. But since you were the one who brought him, the responsibility rests with you. You vouched for him."

"You can't have your blanket back," I said.

The vice president said, "We don't want to be unreasonable. We'll give you until Monday to get Brinkerhoff back. If you don't, we'll never let you bring a friend into our bank again."

Snails

Death of a Gastropod Gladiator May Spark New Controls On the Gallic Way of Preparing and Eating the Escargot

By Ronald Koven

PARIS (WP)— Worms, it seems, are not the only animals that turn. Extract a snail from its shell, and it, too, can turn.

That seems to be the overwhelming lesson that the legions of snail eaters included in the French body politic are reduced to contemplating along with the grief of a great section of the nation after the death this week of a man who had come to be the very embodiment of gastropod gastronomy.

Marc Quinquandon was only 27 when he died this week, but already he had eaten his way to *the top of the slippery world of* snail eating. And the manner of Quinquandon's dying showed that he was not content to rest on his laurels as world champion snail eater.

He was on his way to cutting in *half his own record of* 12 dozen snails agilely pulled from their shells and downed in 11 minutes, 30 seconds — established in July — when indigestion felled him Saturday night.

Their Worst

Within 24 hours, the six dozen snails he had ingested in three minutes had done their worst. Marc Quinquandon, despite all the considerable forces that his *367-pound body could muster*, was no more.

A train engineer, Quinquandon had gained prominence in French snaildom as quickly as the appearance of slugs in the garden after a spring rain. At the Olympic Games of the Absurd in Lorraine in July, he defeated the whole field of challengers for the world title. It was a universally recognized triumph of northern French mind and technique over southern French romanticism as defined in the old Catalan proverb, "In July, neither snails nor women."

As in all things, however, the Gauls are divided in three parts:

• The snail-eaters, who could only be sincere admirers of the man, however much they might also have felt envy, a quality that is not alien to the French national character.

• The frog eaters, a segment of French society whose dominant position is a myth nurtured by the Anglo-Saxons. The insistence of the frog eaters that theirs is a far more subtle eating experience than the vulgar, garlic-laden heartiness of snail consumption is recognized by many non-partisan observers as the bitter expression of a party in decline. The frog eaters will tell you that there is nothing to snail-eating but a rough taste for garlic and a peculiar texture.

• The consumers of steak-pommes frites — that great silent majority *that rejects both the* snail and the frog as unnatural diets that are a bad accompaniment to the national drink, carafe of *gros rouge*.

Omnivorous

Yet in any analysis of France, things are, of course, not that simple. All the hybrid shades of those who eat both snails and frogs in varying proportions must also be taken into consideration in judging the French situation *apres* Quinquandon.

There has always been a small body of medically oriented gourmets who understood the stark truth that snails are hard to digest and that the snail is so omnivorous as to be able to devour plants like belladonna that are potentially fatal to man.

The real connoisseur prefers the rangy taste of the wild snail. But the more prudent and practiced take care to give those snails a minimal domestication of two weeks to allow them to rid themselves of all traces of toxic substances before consigning them to garlic butter.

After *l'affaire* Quinquandon, however, it is an open question whether the snail eaters of France and the commercial interests that crawl behind them are going to be able to maintain their current role in French society.

Unregulated

For one thing, it seems inevitable that the state will be called upon to lay down rules *in one of* the last unregulated sectors of French commerce. According to one estimate, there are 40,000 kinds of edible and non-edible snails. Careful codification of what can and cannot be eaten and under *what conditions opens* tempting vistas for battalions of regulation writers.

There is also going to have to be a more serious cataloging of ways to prepare *escargot*. There are eight recipes in the Languedoc region alone. It may be that the Quinquandon affair is going to give new impetus to those who prepare *escargot* in the dominant Burgundian way that is almost the only method of preparation known in the United States — with melted butter, chopped parsley and heavy on the garlic.

Quinquandon, a Lorrainer from eastern France, represented a dissident faction of snail eaters who say to hell with Burgundy, that is to say, to hell with garlic. The snail recipes of Alsace and Lorraine tend to a balance of herbs with only a *soupcon* of garlic tolerated. The people of Quinquandon's region even had pretentions to ennoble the lowly shelled slug, by cooking it in champagne.

Quinquandon's demise seems likely to produce a counteroffensive by the advocates of a close alliance of the garlic clove and the *escargot* since the Burgundian recipe did not do him in.

Unregulated

For one thing, it seems inevitable that the state will be called upon to lay down rules *in one of* the last unregulated sectors of French commerce. According to one estimate, there are 40,000 kinds of edible and non-edible snails. Careful codification of what can and cannot be eaten and under *what conditions opens* tempting vistas for battalions of regulation writers.

There is also going to have to be a more serious cataloging of ways to prepare *escargot*. There are eight recipes in the Languedoc region alone. It may be that the Quinquandon affair is going to give new impetus to those who prepare *escargot* in the dominant Burgundian way that is almost the only method of preparation known in the United States — with melted butter, chopped parsley and heavy on the garlic.

Quinquandon, a Lorrainer from eastern France, represented a dissident faction of snail eaters who say to hell with Burgundy, that is to say, to hell with garlic. The snail recipes of Alsace and Lorraine tend to a balance of herbs with only a *soupcon* of garlic tolerated. The people of Quinquandon's region even had pretentions to ennoble the lowly shelled slug, by cooking it in champagne.

Quinquandon's demise seems likely to produce a counteroffensive by the advocates of a close alliance of the garlic clove and the *escargot* since the Burgundian recipe did not do him in.

Also at stake is the future of a complicated world commerce. France produced nearly 4,000 tons of snails last year, according to the *escargot* department of the French Canning Confederation.

But the French hunger for the snail outstrips native reproduction. So the French imported more than 9,000 tons, principally from Yugoslavia, Hungary, Turkey and Taiwan (even though there is a lively debate over whether what comes in from Taiwan are proper snails at all. There are those who say they are nothing but rubbery sea slugs sold in cans packaged with containers of empty shells into which the cook is expected to stuff an animal that does not really belong).

Soup and Dancing

Already, there is speculation that the snail-vending interests are not going to hunker down in their shells. They are putting out the story from Quinquandon's native Bouillonville, greeted by Paris observers with reserve and skepticism, that he could not really have died of snail-eating. They claim that eating onion soup and dancing on Saturday night is probably responsible.

That version, however, seems to be out of keeping with the character and dedication of Quinquandon himself, who was in training to set a new record next year. "Quinquandon," said a high-level, frog-eating source who refused to be named, "was a redoubtable adversary whose memory commands respect. Any suggestion that the snails didn't get him is an insult to his memory."

PEOPLE: *Artist Chops Off 2 Fin To Protest 'Runaround*

"First he put the phone down, then he swung the ax," said **Donna Frost**. "Nobody screamed. He didn't make a sound. You can still see where the blade cut into the counter. There wasn't much blood, just a few drops. He left behind a rat trap with a dollar bill in it, his briefcase and his hatchet. He walked out of here so calmly that I thought it was a piece of theater — until I saw his fingers lying on the floor." **Henry Benvenuti** was an artist with a message: He was tired of the runaround. He parked his car in front of the New York office of the SoHo Weekly News, walked to the reception desk where *Donna Frost*, who works in the newspaper's advertising office, was standing. Then he telephoned the editor he had come to see. "He told me," said the News' art editor **Gerald Marzorati**, "he wanted 'to rap about the art world.' I told him, 'Look, man, I'm right on deadline. I'm finishing a column. Leave your number, I'll call you back.' He said I was 'just like all the other art editors,' and that he'd leave a message at the desk. Then he hung up." After he was taken to New York's Bellevue Hospital, Benvenuti told the surgeons that he did not want them to reattach his fingers. "He was speaking to the world," says his roommate **Lenny Ferrari**. "He did it for all the artists who don't have the clout, the connections, who can't come up with the payola. He wasn't depressed or anything. He did it as a sacrifice. He said that he was acting 'in the name of art.' "

* * *

Soviet sculptor **Pavel Bondarenko** is designing a 130-foot monument to the first man in space, cosmonaut **Yuri Gagarin**. Tass said the monument, which will include a 40-foot statue of the space hero, will stand in the north of Moscow. Tass said the Gagarin monument will be the first sculpture to be made of cast titanium, a lustrous silver-white metal widely used in the construction of spacecraft because of its light weight and resistance to heat and pressure. Gagarin made the first manned orbit of the earth in a flight lasting 89 minutes on April 12, 1961. He died in 1968, when a plane he was test-flying crashed.

* * *

Film director **Ingmar Bergman**, who wants to be left alone, may find his hideaway on the Baltic Island of Faro is not such a hideaway after all. Plans are afoot to replace the ferry service between Faro and the neighboring island of Gotland with a $1 million bridge. Bergman fears that once the bridge is the tourists who flock to G will also come to Faro.

ANNOUNCEMENTS

EXTRAORDINARY OPPORTUNITY TO PURCHASE A SWAN 65 SAILING YACHT
A magnificent example of this well known class, this yacht has been maintained to perfection and has been equipped without regard to cost to serve for both cruising and ocean racing. There are 30 hood sails including a roller reefing genoa for cruising. Extensive radios, electronics navigational aids of the highest quality including satellite navigation. Most of the more than 20 Lewmar winches are new including self-tailers and two large coffee grinders which make the yacht manageable for family cruising as well as improve racing performance. The interior is custom-laid to include a library with built-in T.V. and Pioneer home stereo equipment, all doors reinforced as watertight bulkheads, plus all of the normal domestic luxuries found on these yachts. The yacht is registered in Spain (with all duties paid) and thus presents an opportunity to the purchaser to legally charter the yacht in Spain, i.e. thru hotels, agents + brokers, in order to make the yacht a business proposition. The owner will only consider a quick sale as he is in the process of deciding to continue with the project of constructing a new yacht. Therefore the price is only US$ 495,000 - or very close offers. Inspection, sea trial and survey can be arranged immediately. For further information please contact: Fred Hess, Fred Hess International, Puerto Banus, Marbella, Tel. (52) 812869 Telex 77462 E.

Eagles Defeat Steelers, Jets Beat Dolphins

From Agency Dispatches

PHILADELPHIA, Sept. 30 — The Philadelphia Eagles upset the previously unbeaten Pittsburgh Steelers, 17-14, on touchdown runs of one yard each by Leroy Harris and Wilbert Montgomery and a 48-yard field goal by Tony Franklin in a National Football League game here today.

The Steelers, who had won their first four games, took the early lead in the second quarter on a 7-yard run by Sidney Thornton, capping a 47-yard drive. The offensive started with Jack Ham's 28th career pass interception, the most for a linebacker in NFL history.

The Eagles took the ensuing kickoff and moved 80 yards on eight plays to tie the score on a 1-yard dive by fullback Harris. The Eagles then took the second-half kickoff and drove for a first down to the Pittsburgh 33. When three plays netted only 2 yards, Franklin, a rookie barefoot kicker, booted a 48-yard field goal to give Philadelphia a 10-7 lead with 11:26 left in the period.

Jets 33, Dolphins 27

At New York, Tommy Newton, a third-string fullback, knocked Miami out of the unbeaten ranks when he plunged for two second-period touchdowns to lead the New York Jets to a 33-27 upset of the Dolphins.

Newton scored twice on 1-yard plunges to pull New York from a 10-7 deficit to a 20-10 lead. Bobby Jackson set back the Dolphins late in the third period when he returned an interception 58 yards for a touchdown and a 26-10 New York lead. Miami pulled to 26-20 with 2:33 left, but Richard Todd threw a 71-yard scoring pass to Wesley Walker 23 seconds later.

Miami's Bob Griese hit Nat Moore with a 6-yard touchdown pass on the game's final play.

Rookie Johnny Lynn also had a touchdown for New York, recovering a blocked punt in the Miami end zone. Griese, back as Miami's quarterback after sitting out a week with a leg injury, threw scoring passes of 26 yards to Jimmy Cefalo and 18 yards to Bruce Hardy.

Vikings 13, Lions 10

At Pontiac, Mich., Chuck Foreman, benched in the first half for one of the few times in his seven-year career, scored on a 2-yard run late in the third quarter and Rick Danmeier kicked two field goals to give the Minnesota Vikings a 13-10 victory over the Detroit Lions.

Rookie quarterback Jeff Komlo of the Lions threw a 10-yard touchdown pass to running back Rick Kane with 2:40 to play, but Detroit could not avoid its fourth loss in five games. Minnesota is 3-2.

Veteran safety Paul Krause tied Emlen Tunnell's NFL record of 79 career interceptions when he picked off a Komlo pass on the first play of the second quarter.

Redskins 16, Falcons 7

At Atlanta, Joe Theismann riddled Atlanta's pass defense, completing 19 of 26 passes for 232 yards in leading the underdog Washington Redskins to their fourth consecutive triumph, 16-7 over the Falcons.

The Falcons contained Washington's running game, but every time it appeared the Redskins were stopped, Theismann got them moving again with short passes, mainly to Danny Buggs, who caught nine overall.

The Redskins' lone touchdown came on a 1-yard run by John Riggins with 55 seconds left in the first half — one play after Theismann connected with Buggs for his longest pass of the game, a 41-yarder from the Atlanta 42.

Mark Moseley took care of the rest of the Washington scoring — kicking a 45-yard field goal early in the first period, a 53-yarder with 2:53 left in the first half and a 37-yarder on the final play of the third quarter.

The Falcons' only score came on a 84-yard drive the first time they got the ball. Rookie William Andrews went over from 2 yards out with 2:10 left in the first quarter to give Atlanta its only lead of the game.

Saints 24, Giants 14

At New Orleans, Garo Yepremian extended his league record to 19 consecutive field goals and Chuck Muncie ran for two touchdowns to give the New Orleans Saints a 24-14 victory over the New York Giants.

New Orleans opened a 17-0 lead before rookie Phil Simms, seeing his first regular-season NFL action, took over the Giants' offense and led two scoring thrusts. Both drives covered 18 yards and came after interceptions of passes by quarterback Archie Manning of New Orleans.

The first New York score came on a five-yard run by Billy Taylor and the second was an 11-yard pass from Simms to running back Ken Johnson.

New Orleans' touchdowns came on a 10-yard run by Muncie in the second quarter and his three-yard sprint with 41 seconds left in the game. Manning hit wide receiver Ike Harris on a 24-yard touchdown pass play in the third quarter.

With Earnie Shavers standing over him, Larry Holmes lies on the canvas in the ninth round of their championship fight. Holmes was ruled to have slipped, not been knocked down.

Holmes Gets Up to Beat Shavers

By Michael Katz

LAS VEGAS, Sept. 30 (NYT) — Larry Holmes, showing the courage of champions, got off the floor in the seventh round when he looked as if he did not know what state he was in and stopped Earnie Shavers in the 11th round to retain the World Boxing Council's heavyweight championship Friday night.

The referee, David Perl, stopped the bout at 2 minutes of the round after Shavers, who had been hit more often than a quarterback in a month of Sundays, was asked if he wanted to go on. Shavers wearily nodded yes. But Holmes then landed a few more unanswered punches, and the referee moved in.

This was one of the finest performances by the undefeated Holmes. He dominated the fight throughout, with one great exception — when he walked into a right hand late in the seventh round.

Packs a Wallop

Shavers has one of the hardest punches in heavyweight history. This one caught Holmes full, and the 210-pound champion was badly hurt. But he showed he could take a punch. He showed courage, too, somehow surviving the last 30 seconds of the round and resuming full command of the fight in the eighth.

The bout started slowly, tentatively. Shavers, three inches shorter than Holmes, worked on cutting off the ring. Holmes, with the finest left jab in the heavyweight division, worked at keeping the hardest puncher in the division away.

Throughout the early rounds, the 29-year-old champion continued to do very little but jab. Then, in the fourth, he finally landed a right in combination after the jab, and Shavers nodded his head in acknowledgement. A good right lead by Holmes to Shavers' head followed, and moments later a left hook.

Shavers, who weighed in at 211 pounds, a pound more than the champion, cornered Holmes late in the fourth round, but was caught by another right-hand lead. Shavers' left eye was cut.

The 35-year-old Shavers, whose 58 victories included 56 knockouts, had predicted that Holmes would not last five rounds with him. But all he accomplished in the fifth round was to run into a lot of jabs and right-hand leads. Holmes was increasingly going on the attack against the slower challenger.

Both Eyes Cut

The combinations were flowing behind the jabs. By the end of the round, Shavers was reduced to some very wild swings. And in the sixth, Holmes opened a cut over Shavers' right eye.

The champion was moving more, throwing hard left jabs that increasingly were not slipped. Then he would stop and fire a right.

In the seventh, Holmes' trunks were covered by Shavers' blood. Everything was going his way. And then he started getting careless. A wild overhand right caught him on the top of the head. Not much damage.

But then, suddenly, the fight changed. He walked straight into a right and went down in a heap on his left side.

His eyes were glazed as he jumped up at the count of 5 and stumbled while taking the mandatory 8-count. Somehow, he managed to last the final 10 seconds of the round, and by the time the eighth began he seemed to have regained most of his senses.

Other Fights

LAS VEGAS, Sept. 30 (UPI) — In preliminary welterweight matches, Sugar Ray Leonard scored a first-round knockout over Andy Price and Roberto Duran, the former lightweight champion, struggled to a 10-round unanimous decision over unheralded Zeferino Gonzalez.

Wilfredo Gomez successfully defended his World Boxing Council super-bantamweight title by rallying for a 10th-round knockout of Carlos Mendoza.

Lauda Unexpectedly Quits Formula One

From Agency Dispatches

VIENNA, Sept. 30 — Niki Lauda, the former Formula One champion driver, has announced his retirement, effective immediately.

Lauda, 30, made the unexpected announcement Friday in an interview with Austrian television in his Montreal hotel. He had been expected to drive today in the Grand Prix of Canada, the next-to-last race of the season.

The world champion in 1975 and 1977, Lauda had collected only four points in world championship standings so far this season and said he had enough of the "senselessness of driving in circles."

The Austrian, who had been rumored to want to leave his Brabham-Alfa team because of lack of success, was replaced by Ricardo Zunino in the team's BT-49 racer.

"I have realized that there are things in my life which are more important than driving a car in a circle," Lauda said. He made the announcement without any outward emotion, the same style he displayed a little more than two years ago when he announced that he would quit the Ferrari team, where he won glory.

Lauda, who was seriously burned in a crash about three years ago but came back to race again, has threatened to retire on several other occasions. He has also walked out of the Canadian Grand Prix before — in 1977, he left Mosport Park, near Toronto, after complaining about his mechanics.

In Montreal, Bernie Ecclestone, manager of the Brabham team at the Canadian Grand Prix, confirmed yesterday that Lauda had retired. "He just decided to quit because he'd had enough," Ecclestone said. "It happens to everyone."

Strikeout Record

LOS ANGELES, Sept. 30 (UPI) — Pitching the Houston Astros to a 3-0 victory over the Los Angeles Dodgers here yesterday, J.R. Richard (18-13) struck out 11 batters to reach a season total of 313 strikeouts. This set a National League record for a right-hander, 10 more than he recorded last season.

Friday Baseball

Reds Take Championship

CINCINNATI, Sept. 30 (UPI) — The Cincinnati Reds clinched the National League Western Division title here Friday night when Cesar Geronimo and Frank Pastore led them to a 3-0 victory over the Atlanta Braves and the Houston Astros were eliminated by a loss to the Los Angeles Dodgers.

Geronimo, a nearly forgotten member of Cincinnati's 1975 and '76 world championship teams, homered and tripled and Pastore, a rookie, pitched a four-hitter, pacing the Reds over the Braves for their sixth division title of the decade.

Pastore (6-7), who pitched the first complete game of his career in beating the Astros last Sunday, struck out seven and walked one.

Geronimo, platooned in the outfield this season because of a non-productive bat, hit Buddy Solomon's pitch into the right-field stands with one out in the third inning for Cincinnati's first run and his fourth home run of the season.

Batting .238 entering the game, Geronimo then got a gift triple with one out in the fifth when center fielder Ed Miller slipped on the soggy turf chasing a looping hit to left center. Geronimo scored on Dave Collins' two-out single to right.

The Reds scored a third run in the eighth when Dave Concepcion singled, went to third on George Foster's single and scored on Johnny Bench's sacrifice fly off reliever Joey McLaughlin.

Dick Wagner, the president of the Reds, who refused until this past year to dip into the baseball free-agent draft and still refuses to give out guaranteed contracts, saw the division title as a vindication of some of the Reds' operating methods. Wagner took criticism for, among other things, refusing to meet contract terms set by Pete Rose.

"I think it shows maybe we can triumph without some of the things going on in our business," Wagner said.

"It's a very satisfying feeling," aded John McNamara, who replaced the popular Sparky Anderson as manager over the winter.

Dodgers 6, Astros 5

At Los Angeles, Steve Garvey hit a grand-slam home run in the eighth inning to erase a 5-1 Houston lead and give the Dodgers a 6-5 victory over the Astros. The loss left Houston 3 ½ games off the lead with just two to play.

The grand slam was the fourth in Garvey's career and came off loser Vern Ruhle (2-5), who entered the game in the eighth in relief of Ken Forsch. The Astros scrambled back from a 1-0 deficit in the seventh when Jose Cruz singled and Enos Cabell tripled him home with two out.

In the eighth, pinch hitter Dave Bergman, batting for Forsch, singled home pinch runner Jimmy Sexton. Cesar Cedeno then hit a three-run homer off Charlie Hough to put the Astros in front 5-1.

But the Dodgers — who won the West title the last two years but who fell far out of this year's race early in the season — scored five times in the eighth off Ruhle on a run-scoring single by Von Joshua and Garvey's hit.

Pirates 6, Cubs 1

At Pittsburgh, Dave Parker drove in three runs with a single and a two-run homer and Jim Bibby pitched a four-hitter to lead the Pirates to a 6-1 victory over the Chicago Cubs.

Parker singled in the Pirates' first run in the first inning off Rick Reuschel (18-12), then capped a four-run second with his second homer in two games and his 25th of the season. Tim Foli and Dale Berra each singled home a run for the Pirates and another scored on left fielder Dave Kingman's fielding error.

Bibby, whose 12-4 record is the best winning percentage in the National League, walked 4 and struck out 11, a personal season high. Last year he was 8-7.

Phillies 3, Expos 2

At Montreal, Keith Moreland singled home Greg Gross from third base with two out in the 11th inning to give the Philadelphia Phillies a 3-2 victory over the Montreal Expos.

Gross hit a hard grounder to third base that eluded Larry Parrish for an error. Warren Cromartie picked up the ball in left field but threw wildly to second, Gross moving to third. After pinch-hitter Greg Luzinski was walked intentionally by loser Woodie Fryman (3-6) and replaced by pinch runner Mike Anderson, Moreland drove in Gross.

Saturday: The Expos Make It a Race Again

MONTREAL, Sept. 30 (UPI) — Pinch-hitter Dave Cash greeted reliever Tug McGraw with a one-out single to score pinch-runner Tim Raines from third base with the winning run in the ninth inning here yesterday and give the Montreal Expos a 3-2 victory over the Philadelphia Phillies.

The Expos, who entered the game two games behind the Pittsburgh Pirates in the National League East, reduced the gap to one game when the Pirates lost to the Chicago Cubs yesterday.

The two teams are even in the loss column and the Pirates have one regularly scheduled game to play. If the Pirates fail to clinch today, Montreal will travel to Atlanta tomorrow for a makeup doubleheader with the Braves.

If the teams remain tied after those games, they would play off for the division title on Tuesday, thus delaying the start of the National League playoffs by one day.

In the winning rally yesterday, Ellis Valentine opened the ninth with a single off loser Rawly Eastwick (3-6) and Raines replaced him as a pinch-runner. He moved to second on Larry Parrish's sacrifice bunt and to third on a wild pitch. Chris Speier walked before Cash drove his winning hit over the head of right fielder Bake McBride, playing in shallow right.

The Phillies tied the game against winning reliever Elias Sosa (8-7) with two out in the ninth when pinch-hitter Greg Gross walked, Pete Rose beat out an infield hit and Tim McCarver delivered a pinch single to drive in Gross.

The Expos got both their runs in the first off Randy Lerch. Warren Cromartie opened the inning with a double and advanced to third when Rodney Scott grounded out. Cromartie scored on Andre Dawson's single to center.

Dawson stole second and moved to third when Tony Perez flied out to right. John Tamargo, filling in for injured catcher Gary Carter delivered a single to bring in Dawson.

The Phillies, who squandered three earlier scoring chances, reached Bill Lee for a run in the eighth inning when, with one out, Mike Schmidt doubled off the left-field wall, moved to third when Greg Luzinski flied out to center and came home on Lonnie Smith's infield single to deep short.

The Phillies had runners at first and third with none out in the first but did not score. Rose led off the game with a single, stole second and moved to third on Larry Bowa's single. Lee then retired Schmidt, Luzinski and Smith to end the threat.

In the second, Philadelphia loaded the bases with two out but Lee got Bowa to hit into a fielder's choice to choke off that rally. The Phillies also had their first two runners aboard in the fourth before Lee retired the side.

Cubs 7, Pirates 6

At Pittsburgh, Mick Kelleher scored on a throwing error by Willie Stargell with two out in the top of the 13th inning, giving the Chicago Cubs a 7-6 victory over the Pittsburgh Pirates.

Kelleher opened the 13th with a single up the middle off reliever Don Robinson and advanced on a sacrifice by reliever Bill Caudill. Jerry Martin then hit a ground ball that third baseman Bill Madlock fielded and threw to Stargell at first, but Stargell overthrew third in an attempt to catch Kelleher crossing over. Instead he scored on the play.

Caudill then retired the Pirates in the bottom of the inning to record his first victory in eight decisions and his first major-league triumph. He pitched 2 1-3 innings, walking two and striking out four, including Stargell with two on to end the game.

The Pirates, trailing, 6-3, rallied for one run in the sixth and two in the seventh to tie the game. Madlock played a key role in both rallies. He led off the sixth with a double, advanced to third on a single by Ed Ott and scored when Phil Garner hit into a fielder's choice.

Tim Foli led off the seventh with a single, chasing reliever Dick Tidrow, and Dave Parker greeted Bruce Sutter with his fourth single in four at-bats. Both runners advanced on Sutter's wild pitch and, one out later, Foli scored on John Milner's sacrifice fly. Madlock followed with an RBI double.

The Cubs scored five runs in the top of the sixth to rebound from a 3-1 deficit and chase starter Bert Blyleven.

With one out, Scot Thompson walked and went to third on Bill Buckner's double to right. Dave Kingman's infield single scored Thompson and Larry Biittner's fly sent Buckner to third. Steve Ontiveros then doubled Buckner and Kingman home.

Enrique Romo replaced Blyleven and allowed an RBI single to Kelleher, who then advanced to third on Parker's bad throw home. Romo walked Tim Blackwell and Mike Vail followed with a pinch single that scored Kelleher.

The Cubs were blanked until the fifth when Ontiveros singled with one out, advanced on Kelleher's hit and scored on Blackwell's sacrifice fly.

The Pirates took a 3-0 lead in the first against Dennis Lamp. Leadoff batter Omar Moreno was safe on an error and stole second. Foli then walked and both he and Moreno advanced on Parker's single. Stargell's single scored Moreno and Foli before Parker came home on a sacrifice fly by Madlock.

Canadian Rugby Squad Advances to Second Rank

By Bob Donahue

PARIS, Sept. 30 (IHT) — Canada's national rugby squad flew home today from a European tour that established Canada as a second-echelon world power. Whether that is a discouraging conclusion for the future of North American rugby depends on how the home front reacts to a positive tour tally of three victories, a draw and two defeats.

The bitter pill will be the lopsided score, 34-15, of the tour's big match, against France here yesterday. A 14-4 victory over France B in Lille on Wednesday — after successes in Britain against Somerset and Cornwall, a loss to Cardiff and an unlucky draw with Southern Counties — had raised legitimate Canadian hope of a strong finale.

Finicky Welsh refereeing, which broke the impetus of attacking pressure and spoiled the show at Charlety Stadium, in effect deprived the Canadians of the advantage of their tour-acquired fitness and let France's less-fit forwards catch their breath at every interruption.

Second-Half Rally

Down, 19-0, early in the second half, Canada surged back with a penalty by fullback William Taylor, a drop by center Andrew Bibby and a try by right wing Rob Greig, after a weaving midfield break by Bibby, that Taylor converted. At 19-12 and then 22-15 in the 37th minute of the half, the points spread did justice to Canadian strength at the lineouts, grit in the loose and offensive enterprise from the third row all the way back to fullback.

Then confusion at a tapped penalty near the Canadian line gave French center Christian Belascain a gift try between the posts. Flyhalf Alain Caussade converted it, and soon converted a fourth French try, this one by right wing Jean-Francois Gourdon in an attack launched from a scrum.

It was appropriate that the French should apply the finishing touch from a scrum. Canada's pack, which slightly outweighed the French forwards, nevertheless spent much of the afternoon scrummaging in reverse, often at embarrassing speed. Technique was the difference — in the scrums and, generally, wherever Jacques Cristina, the French captain and No. 8, was involved.

France's early tries were scored by scrumhalf Jerome Gallion (from a scrum) and fullback Serge Blanco. Caussade accounted for 18 points with three penalties, a drop and three conversions.

Turnaround for B Squad

The final score revived memories of the tour of England by the United States two years ago, which ended in an unnecessarily lopsided loss, 37-11, against England at Twickenham. The United States lost four of its six matches, winning two. Canada has now done better. And the France B squad that Canada humbled Wednesday thrashed England B in Brussels yesterday, 25-9.

Both North American teams were often crowd favorites in Europe. Talent was seen to deserve better results, and attacking verve often compared favorably with the staid efficiency of the major powers — Australia, England, France, Ireland, New Zealand, Scotland, South Africa and Wales.

The second-zone countries keep knocking at the door. Argentina was in New Zealand this month. Romania is in Britain for the first time, on a tour of Wales that will come to a climax in Cardiff on Saturday. The United States is to tour France next September.

South African Team Off on British Tour

JOHANNESBURG, Sept. 30 (UPI) — The multi-racial South African Barbarian rugby team left for Britain today for the start of their eight-match tour amid threats of large scale anti-apartheid demonstrations.

The Barbarian team is made up of eight black, eight mixed-color and eight white players. The tour has raised a storm in England where the government fears that the tour of the South African team could jeopardize British participation in the 1980 Olympic Games in Moscow.

New Race Team For Zoetemelk

CHAVILLY, France, Sept. 30 (UPI) — Joop Zoetemelk won the final French bicycle classic of the season here today and then announced that he would change teams for next year's races.

He will join T.I. Raleigh, which is based in the Netherlands and is known for its strong sprinters and weak mountain climbers. Zoetemelk has finished second in the Tour de France a record five times, most recently this year, and has said that the Raleigh team speed would have helped him more than the overall support of his Mercier teammates.

In winning the Grand Prix d'Automne from Blois today, Zoetemelk edged Giuseppe Saronni, in second place.

Switch-Hitting Mark Set by Templeton

ST. LOUIS, Sept. 30 (UPI) — Garry Templeton has become the first player in major-league history to collect 100 or more hits batting from each side of the plate in a season.

The St. Louis Cardinal shortstop, batting right-handed, bunted safely for his 100th right-handed hit of the year in a game against the New York Mets on Friday. Templeton already had more than 100 hits left-handed.

More Sports On Page 13

Notre Dame Upsets Unbeaten Michigan State, 27-3

SOUTH BEND, Ind., Sept. 30 (UPI) — Halfback Vagas Ferguson rushed for 169 yards in 28 carries and scored two touchdowns yesterday as Notre Dame beat Michigan State, 27-3, ending the Spartans' winning streak at 10 games.

Ferguson scored on runs of 24 and 48 yards after the Irish, 2-1, took a 13-3 halftime lead. For Michigan State, 3-1, it was the first defeat since the Spartans lost to Notre Dame a year ago, 29-25.

Notre Dame scored first on a 14-yard pass from Rusty Lisch to Tony Hunter with four minutes left in the first quarter. Chuck Male kicked field goals of 49 and 36 yards for the Irish in the second period. Michigan State scored on a 53-yard field goal by Morten Anderson on the last play of the first half.

Nebraska 42, Penn State 17

At Lincoln, Neb., Nebraska scored four touchdowns in the second period to defeat Penn State, 42-17.

Tim Hager, starting at quarterback for the Cornhuskers for the first time, completed 14 of 22 passes, including touchdown passes of 11 and 78 yards to Junior Miller after the Nittany Lions took a 14-0 lead.

Penn State, 1-2, rushed for only 60 yards and finished with 123 yards passing. Nebraska, 3-0, compiled 530 yards on offense.

Texas 21, Missouri 0

At Columbia, Mo., John Goodson kicked four field goals, tying a school record, and A.J. Jones had a 1-yard touchdown run as Texas defeated Missouri, 21-0.

Goodson, a sophomore, had field goals of 23, 50, 35 and 25 yards. Jones rushed for 142 yards in 30 carries.

Texas scored the first three times that it touched the ball, with Goodson kicking a pair of field goals and defensive end Richard Slaydon blocking a Missouri punt out of the end zone for a safety.

Southern Cal 17, LSU 12

At Baton Rouge, La., Southern California needed two fourth-quarter touchdowns — including an 8-yard scoring pass from Paul McDonald to flanker Kevin Williams with 32 seconds left — to gain a 17-12 victory over LSU.

The Trojans' winning drive — 79 yards in 10 plays — started with 4:16 to play after an LSU face-mask penalty forced the Tigers to punt. LSU led through most of the game on LeRoid Jones' touchdown reception and two field goals by Don Bartel, the second of which gave the Tigers a 12-10 lead late in the game.

Tailback Charles White rushed for 185 yards and Southern Cal's other touchdown. The Trojans had trouble through the first three periods with several delay-of-game penalties and five fumbles.

Ohio State 17, UCLA 13

At Los Angeles, quarterback Art Schlichter hit fullback Paul Campbell with a 2-yard touchdown pass with 46 seconds to play as Ohio State rallied for a 17-13 victory over UCLA.

It was the fourth victory for the undefeated Buckeyes; the Bruins' record fell to 2-2. UCLA's Peter Boermeester, who had two field goals earlier, missed a pair of field-goal attempts in the final five minutes. After the second attempt failed, Ohio State drove 80 yards in 1:35 for the decisive touchdown.

Alabama 66, Vanderbilt 3

At Nashville, Tenn., quarterback Steadman Shealy had two touchdown runs and Alabama gained 601 total yards in routing Vanderbilt, 66-3. Shealy's first touchdown was a 65-yard run on Alabama's second offensive play of the game.

Colorado 17, Indiana 16

At Bloomington, Ind., cornerback Mark Haynes blocked an extra-point attempt in the final period to help Colorado beat Indiana, 17-16. It was Colorado's first victory under coach Chuck Fairbanks and Indiana's first defeat of the season.

Indiana went ahead, 16-10, early in the fourth quarter on a 20-yard run by Mike Harkrader, but Haynes blocked Steve Stranb's conversion attempt.

Quarterback Bill Solomon put Colorado ahead four minutes later when he scored from the 1 and Tom Field kicked the extra point.

Kentucky 14, Maryland 7

At Lexington, Ky., Kentucky held Charlie Wysocki, the nation's leading rusher, to 59 yards — 100 less than his season average — in a 14-7 victory over previously unbeaten Maryland.

Kentucky scored twice in the first half — on a 3-yard run by quarterback Mike Shutt and on a 2-yard run by Chris Jones.

Oklahoma 63, Rice 21

At Houston, tailback Billy Sims, last year's Heisman Trophy winner, ran for three touchdowns in the first quarter and Oklahoma went on to rout Rice, 63-21.

Rutgers 38, Princeton 14

At Princeton, N.J., Brian Crockett caught a third-quarter touchdown pass to break a 14-14 tie in Rutgers' 38-14 victory over Princeton. It was the last meeting here of the two rivals, who played the first intercollegiate football game in 1869. They will play for the last time next year at Rutgers, which chose to end the series in an attempt to play bigger football powers and bolster its own reputation.

Tennessee 35, Auburn 17

At Knoxville, Tenn., Jimmy Streater passed for one touchdown and rushed for two others and Gary Moore returned the opening kickoff 98 yards for a touchdown as Tennessee defeated Auburn, 35-17.

Tulane 24, SMU 17

At New Orleans, halfback Marvin Christian ran for a 19-yard touchdown in the fourth quarter to give Tulane a 24-17 victory over previously undefeated Southern Methodist. Christian rushed for 109 yards in 17 carries.

Shippensburg 45, Slippery Rock 14

At Ann Arbor, Mich., fullback Steve Moskowitz ran for touchdowns of 75 and 63 yards on his first two carries as Shippensburg State beat Slippery Rock, 45-14, before 61,143 fans, a record crowd for an NCAA Division 3 game.

Being Legendary

PARIS — It isn't enough to be Bob Hope once, you've got to be Bob Hope forever.

That's the trouble with America. Every day makes a new demand on everybody who is anybody, as the saying is.

When it began to be impossible for Ernest Hemingway to be himself all over again every time, whether traveling the world, or at his finca, as he called it, in Cuba, the world-famous writer began to experience terrible depression. It was impossible for him to relax, for that seemed to be what his fans and admirers did.

And F. Scott Fitzgerald, when the champagne suddenly went flat and Zelda wanted to write novels, too, Fitzgerald couldn't write at all, but kept trying, and finally went to Hollywood, where it was part of holy writ and proud tradition for writers not to write. But even then he was so unhappy about not really being Scott Fitzgerald again every time he met somebody new, or was confronted with a new problem or situation, that he became alcoholic, evil-mannered, and had to run to somebody something like Zelda but not Zelda, poor girl, and cry to her like a small child.

John Wayne found out how to be John Wayne ten thousand times over, but it wasn't himself, ever, although it may very well be irrelevant that even he didn't suspect that he had taken over the invention and had abandoned the reality.

There is nothing wrong of course with choosing who you want to be and then becoming that invention, but it is at least a little tiring to be required to be somebody you didn't choose, and to find it impossible either to refuse to go on with it, or to make the imposition the means to a new way of enjoying absurdity, as we must suspect the multimillionaire singers-exploiters of silly empty children with unlimited supplies of money have done, and go right on doing.

Rodney Dangerfield selected that name and began to point out in a nagging tone of voice how belittled he was by his wife, his son, his daughter, the world, and cats, dogs, worms, and geranium plants. He can keep up the invention fairly easily because he also owns and operates a profitable restaurant, and he could say, in the manner of an anonymous comedian in Sun Time Vaudeville in Fresno 60 years ago — "Go ahead, don't applaud, don't laugh, I kill myself up here on the stage singing snappy songs, saying romantic sayings, and dancing like mad, and still you ignore me. Well, go ahead, I don't have to do this for a living, I've got a Confederate rifle and I can have it repaired any time I like and stick up a bank."

If you do something special for a living, you are in a lot of trouble, because you have either got to be good, or you have got to learn how not to mind if everybody notices that you stink.

* * *

Bob Hope long ago made known that he keeps employed full-time a half dozen writers who furnish him with snappy one-liners, as they are called, many of them local, as when he (and the writers) are paid a hundred grand for a one-shot late-afternoon appearance at a County Fair in Arkansas. And of course he had good lines about our big Army men during the long visit to Vietnam, which it is understandable he never suspected was a crime as much against the American nation as it was against all Vietnamese people. Why should he be held responsible for our being there? Bob Hope's job was only to amuse the troops with his one-liners, his girls who were really stacked, as confused soldiers tend to say, not really knowing how else to put it. I remember having had pneumonia and being invited to join the other boys in a special part of the hospital to be entertained by Bob Hope. I refused to go, of course, but enough of the sick accepted orders to go to permit Bob Hope to continue to believe that he was beloved of the heroes.

Greta Garbo turned her back on her fame, and millions of dollars of comparatively easy money, because she just didn't want to have any more of the strain of being legendary.

Well, the president has a brother who is legendary, but he himself is not. Indeed he seems to be anti-legendary. I remember how 30 years or so ago Jack Paar used to ridicule a man named Hugh Downs who was the original Mr. Nice Guy, and very decent and well-informed, too.

Where is Jack Paar today, and where is Hugh Downs?

Every time I see the president I somehow believe I am seeing Hugh Downs.

Can such a man get re-elected? Who knows? And who does Edward Kennedy remind us of? Well, John Connolly, it seems: and may neither choose to run or God give me a double-helping of help.

Send Out the Clowns

In the Circus of Soviet Refuseniks

By Philip Hilts

WASHINGTON (WP) — At one moment in their performance of the little play "Refuseniks," the Kozhevnikovs, comic actors recently released from the Soviet Union after three years of waiting, mimic the conversation of those who are still in the Soviet Union, waiting to get out.

"You want to go? You'll have to bribe someone . . . So you don't think they take bribes? Correct. They don't. But only so long as nobody offers. It's dangerous — when nobody gives bribes, it's difficult for them to prove they don't take bribes. So the procedure is as follows:

"You give, they don't take. You leave, because if you don't leave then one might think they have taken; but you didn't give. Is it clear?"

"I didn't give! I didn't give!" said Evgeny Kozhevnikov, throwing up his hands and walking away.

Evgeny and his wife Olga are clowns, comic actors of unusual talent, and the play they perform about refusenik life is a poignant, black comedy. But in their hotel room before a recent performance for the Union of Councils for Soviet Jews they spoke seriously, most of the time.

"The first thing that happens to you when you apply for a visa to leave is that you lose your job," says Evgeny, who is leaning against the back of a chair. He is wearing a green leather jacket and a checked shirt. He is smiling through his full beard. "But of course you cannot be without a job in the Soviet Union. It is a crime to be 'a parasite.' So you must try to get a job . . ."

Footfalls Overhead

And there are the shadows. "When you walk along the street," Olga says, "a black car is slowly following you down the street. They will park in front of your apartment. They watch you leave in the morning. At night, you hear footfalls on the roof overhead."

Olga is a bright, energetic woman whose gestures are broad and heavy and emphatically Russian. But her thin frame and quick smile make her resemble the actress Sandy Duncan.

Of course without work, the refuseniks have little or no money. They live in squalid flats without furniture, without curtains, without telephones, and with no shades for the bare light bulbs.

The Kozhevnikovs, with a humor typical of shtetl life, say that of course the lack of furniture was quite convenient — they could fit more people in their 10-by-16 apartment for their little performances.

It was this performance which became quite famous on the underground network, and made them so popular that Soviet officials felt perhaps they should be given visas after all, to get them out of the hair of the bureaucrats in charge of refuseniks.

"Some had it worse than us," Olga said. She mentioned Benjamin Bogolmolny, who is the lorigest of the long-suffering refuseniks. He applied for his visa more than 13 years ago. As soon as he applied for a visa, he was drafted into the army while his family was allowed to emigrate. Then, after his years of army service, his visa was refused because he may have learned state secrets while in the army. He dug ditches in a construction battalion.

Fear and Frustration

Bogolmolny was constantly followed, and when he once went to a demonstration, says Olga, "he returned to his apartment and found the door broken down, and everything inside completely smashed. He had nothing left. They do these little things as warnings."

The psychological effect of these hauntings is double. They create fear and frustration; but also they breed humor and comradeship among the waiting refuseniks.

One of the most important factors in the Kozhevnikovs' seeking to leave Russia was the time when, after working for two years and touring the country with a satirical play, the play was suddenly determined to be "anti-Sovietik."

Asked why it was banned, Olga replied, "Why? Who can tell? They give no sensible reasons . . ." And the Kozhevnikovs were reminded of the Soviet joke in which the rabbit is running wildly through the woods. A bird asked what he was running away from. "The KGB is arresting all the camels," the rabbit replied.

"But if they are arresting camels, why are you running away?" the bird asked. "Don't ask me," said the rabbit in flight, "ask the KGB!"

"It is like this," Olga said, with eyes wide, "you many do something or say something, and you never know what they will reply . . ."

When the Kozhevnikovs over the years have had lines deleted in their little vaudeville routines, or whole plays pulled out from under them, they were irritated, but quickly turned to the universal act of defense in such circumstances — the shrug.

John McDonnell/The Washington Post

Olga and Evgeny Kozhevnikov.

But eventually, the difficulties of getting even the most innocuous material past censors, and because they wanted to give their son Anton a Jewish life and education, which are illegal in the Soviet Union, the Kozhevnikovs determined to emigrate.

As soon as they applied for the visa three years ago, they had to ask their boss for their employment papers and were required to give the reason they needed them. Their boss was kind enough to let them resign before he fired them.

They had fallen into the ranks of the 2,000 refuseniks and began to go to the Moscow synagogue on Saturdays — the gathering place for refuseniks to trade stories and fears and jokes. They began to attend some demonstrations.

But of course it is a crime to demonstrate outside, so refuseniks hang from windows chanting and waving signs. The KGB is not allowed to break into private apartments.

Eventually, the Kozhevnikovs decided their best protest would be on stage, even if the stage was three-by-three, and even if the theater was one room of their one-and-a-half-room apartment. It had to be inside because a play outside would be a political crime, and it had to be free because if they charged, it would be an economic crime.

So they began to perform "The Life of a Refusenik," an underground diary written by the well-known Soviet Jewish poet Felix Kandel. To his diary they added some folk songs — Russian and Jewish — and comedy sketches done in clown faces.

And on a recent Sunday evening, from out of nonexistence in the Soviet Union, the Kozhevnikovs played "Refuseniks" once again, for the 36th time, before 200 people attending the Union of Councils for Soviet Jews.

At the end of the one-hour performance, all were standing, many crying, and all applauding as loud as they could. For five minutes. Now, though the Kozhevnikovs have no jobs and no money for traveling, they hope to take their performance around the country, to Jewish groups and others who will have them, to anyone who wants to know about the ghosts of the Soviet Union.

PEOPLE: *Sophia Loren Suing Over Nude Photos*

Actress **Sophia Loren** took the editors of an Italian picture magazine to court in Rome over the weekend and complained they had violated her right to privacy with the publication of photographs showing her sunbathing in the nude. Miss Loren said a photographer for the magazine "Gente" used a telephoto lens to snap pictures of her enjoying the sun beside the Paris pool of family friend **Rodolfo Troques**. Miss Loren accused "Gente" under Art. 615 of the penal code, which forbids the "use of telephoto lenses to secretly photograph people on private property."

* * *

When word got out that **Edward Elicofon**, a Brooklyn lawyer and noted art collector, was to have part of his collection sold at auction at Christie's this week, some denizens of the New York art world may have gasped with anticipation. But no, the two Durers that Elicofon bought for a trifling $450 in 1946 are not up for sale. The Christie's auction will dispose only of Elicofon's important collection of Oriental art. Those Durers, now worth more than $3 million, are in a bank vault, still pending the outcome of 20 years of litigation in Federal Court in Brooklyn. Elicofon obtained the portraits of **Hans** and **Felicitus Tucher**, which **Albrecht Durer** painted in 1499, from a young man who said he bought them in Germany while serving there in World War II. The portraits hung in Elicofon's home until 1966, when they were listed in a German book as missing. The court in Brooklyn has had the case since 1969, but it has yet to determine whether the paintings, in oil on wood, belong to Elicofon; their former owner, the **Grand Duchess of Sachsen Weimar**, or the government of East Germany, from which she fled. If at last the treasures go to Elicofon, he has said, he will sell them.

* * *

Ed and **Kay Thompson** of Clinton, Mass., are becoming regulars at the White House. The Thompsons, who were hosts to **President Carter** two years ago when he held one his town meetings, have been invited to the White House to attend a reception for **Pope John Paul II** next Saturday. "I just can't believe it's happening," Mrs. Thompson says. "I'm not asking how or why." Her husband, an office manager for a beer distributor, said, "We have a Polish daughter-in-law and I'm going to try to learn a few Polish expressions." The Thompsons also were invited to the White House last April, to a state dinner for President Nicolae Ceaucescu of Romania. The Thompsons are Catholics, and Mrs. Thompson said her religion "is my life."

* * *

Yale's latest Chubb Fellow is **Shirley Temple Black**, who has wound up three days on the campus at New Haven, holding seminars with students and dropping in on classes. Even to this day, said the 51-year-old Mrs. Black, the fact that she was a child movie star helps her along in life. "Little Shirley opens up doors for Shirley Temple Black," she said. "If big Shirley can't produce, the doors close." Mrs. Black, who served as a diplomat in the Nixon administration, recalled that when she met **Nikita Khrushchev** in California, he clasped her hands to his stomach and beamed warmly. "He and his wife loved the old movies," she said. "It's marvelous to have the link with the past where people have a friendly link with you."

* * *

Friday was moving day for **Andrew Young**, former chief United States delegate at the United Nations. He cleared out of the nine-room suite at the Waldorf Towers that has been maintained for many years by the State Department as the residence of the chief of the U.S. Mission at the United Nations. The move, a hotel employee said, took "a couple of hours."

* * *

Patients entered his fashionable New York office feeling low, **Dr. Max Jacobson** once said, and "went out the door singing." They were the wealthy and the famous. President **John F. Kennedy** was among those treated by Jacobson, as were **Cecil B. De Mille**, **Tennessee Williams**, **Truman Capote** and the photographer **Mark Shaw**, who died of amphetamine poisoning. Amphetamine was Jacobson's stock in trade. He used injections of the stimulant mixed with vitamins and hormones to cure a variety of ills. But after wide publicity, New York State revoked his medical license in 1975 for unprofessional conduct and deceit. Recently, Jacobson applied to have his license restored. He was turned down unanimously on June 21. State officials said the 78-year-old doctor did not seem to be ready to enter the "mainstream of practice." Jacobson, who maintained in the past that his treatments were legal and safe, refuses to comment.

— SAMUEL JUSTICE
